Proefschrift

ter verkrijging van

de graad van Doctor aan de Universiteit Leiden,

op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,

volgens besluit van het College voor Promoties

te verdedigen op donderdag 30 januari 2020

klokke 15.00 uur

door

Ayla Carmel Kempers

geboren te Amsterdam

in 1989

Promotores: Prof.dr. R.E.M. Toes
Prof.dr. T.W.J. Huizinga

Co-promotor: Dr. H.U. Scherer

Promotiecommissie: Prof.dr. A.H.M. van der Helm-van Mil
Prof.dr. W. Jiskoot
Dr. J.H.W. Leusen, Universitair Medisch Centrum Utrecht

CONTENTS

Chapter 1	Introduction	7
Chapter 2	Synovial fluid mononuclear cells provide an environment for long-term survival of antibody-secreting cells and promote the spontaneous production of anti-citrullinated protein antibodies	27
Chapter 3	The extensive glycosylation of the ACPA variable domain observed for ACPA-IgG is absent from ACPA-IgM and ACPA-IgG3	47
Chapter 4	Fc gamma receptor binding profile of anti-citrullinated protein antibodies in immune complexes suggests a role for FcγRI in the pathogenesis of synovial inflammation	59
Chapter 5	Rheumatoid Factors Do Not Preferentially Bind to ACPA-IgG or IgG with Altered Galactosylation	85
Chapter 6	Interleukin-10 differentially modulates IgG Fc glycosylation in human B cells	105
Chapter 7	Summary and discussion	123
Chapter 8	Nederlandse samenvatting	139
	List of publications	147
	Curriculum Vitae	149
	Acknowledgements	150
