|                                                                                                                   |    |
|-------------------------------------------------------------------------------------------------------------------|----|
| List of Figures .....                                                                                             | 9  |
| Acknowledgements.....                                                                                             | 11 |
| A Note on Transcription and Translation.....                                                                      | 13 |
| Introduction .....                                                                                                | 15 |
| <b>Chapter One - Izcatqui</b> .....                                                                               | 21 |
| 1.1 Acquisition and Composition .....                                                                             | 21 |
| 1.2 Dating Izcatqui .....                                                                                         | 22 |
| 1.2.1 Paleography and production .....                                                                            | 23 |
| 1.2.2 Linguistics and Lockhart's three phases .....                                                               | 25 |
| 1.3 Previous study.....                                                                                           | 30 |
| 1.4 Contents in summary .....                                                                                     | 31 |
| 1.4.1 Summary of themes present in Izcatqui .....                                                                 | 31 |
| 1.4.2 Listing of section headings.....                                                                            | 34 |
| 1.4.3 Illustrations, tables and diagrams.....                                                                     | 39 |
| 1.5 Concluding remarks .....                                                                                      | 44 |
| <b>Chapter Two - Reportorio de los Tiempos</b> .....                                                              | 47 |
| 2.1 The development of a "guide to life" .....                                                                    | 47 |
| 2.2 The reportorio in Spain .....                                                                                 | 48 |
| 2.3 Astrological texts and readership.....                                                                        | 50 |
| 2.4 Imported and locally produced <i>reportorios</i> .....                                                        | 52 |
| 2.5 The Inquisition and censorship.....                                                                           | 53 |
| 2.6 Izcatqui and possible source texts.....                                                                       | 55 |
| 2.6.1 Diagnostic features of Izcatqui .....                                                                       | 64 |
| 2.7 Concluding remarks .....                                                                                      | 74 |
| <b>Chapter Three - Translations of the <i>reportorio</i> genre in Nahuatl, Otomí, and Yucatec Maya</b> .....      | 75 |
| 3.1 A <i>reportorio</i> in an edition of the Doctrina cristiana en lengua Mexicana, by Pedro de Gante [1553]..... | 75 |
| 3.1.1 Examples of cultural translation .....                                                                      | 78 |

|                     |                                                                                                              |            |
|---------------------|--------------------------------------------------------------------------------------------------------------|------------|
| 3.2                 | Codex Mexicanus .....                                                                                        | 80         |
| 3.2.1               | Content derived from the <i>reportorio</i> genre and its interpretation.....                                 | 81         |
| 3.2.1.1             | Pages 1-8: the Saint's calendar and Dominical Letters .....                                                  | 81         |
| 3.2.1.2             | Page 10: an Aureus Numerus table .....                                                                       | 84         |
| 3.2.1.3             | Page 12: a drawing of Zodiac Man .....                                                                       | 84         |
| 3.2.1.4             | Page 24-34: textual descriptions of the twelve Zodiac signs.....                                             | 86         |
| 3.3                 | Fonds Mexicain 381.....                                                                                      | 87         |
| 3.3.1               | The Winds and the Zodiac Signs .....                                                                         | 88         |
| 3.3.2               | Cultural translation and the presence of Mesoamerican cultural memory .....                                  | 92         |
| 3.4                 | Appropriation of a <i>reportorio</i> in Codex Huichapan in Otomí.....                                        | 93         |
| 3.5                 | Corpus of Yucatec Maya translations: Books of Chilam Balam .....                                             | 98         |
| 3.5.1               | Chilam Balam of Kaua.....                                                                                    | 99         |
| 3.5.1.1             | Content and source texts .....                                                                               | 99         |
| 3.5.1.2             | Interpretation of Mayan tz'ib [scribe] .....                                                                 | 100        |
| 3.5.2               | Chilam Balam of Ixil.....                                                                                    | 101        |
| 3.5.3               | Chilam Balam of Chan Cah.....                                                                                | 103        |
| 3.5.3.1             | History of Doncella Teodora: a story about knowledge.....                                                    | 104        |
| 3.5.3.2             | Reportorio de los tiempos as cited by Teodora.....                                                           | 106        |
| 3.6                 | Concluding remarks .....                                                                                     | 110        |
| <b>Chapter Four</b> | <b>- A Religious Prologue: The Holy Bull of the Holy Crusade .....</b>                                       | <b>113</b> |
| 4.1                 | Incorporation of the Americas into the Christian realm .....                                                 | 113        |
| 4.1.1               | Extension of the Holy Bull of the Holy Crusade .....                                                         | 117        |
| 4.2                 | The sacrament of confession and the <i>Indulgencia plenaria</i> .....                                        | 120        |

## Acknowledgements

This dissertation would not be here in the present without the help of many in the past. Foremost, I would like to thank Professor dr. Maarten Jansen. The manuscript Izcatqui was introduced to our Classical Nahuatl course where a select group of students discussed its first pages. By the end of the course, three students remained and more so, an interest for this enigmatic manuscript. I thank Professor dr. Jansen for his enduring support, that never demised during this journey of highs and lows. That Classical Nahuatl class was taught by dr. Søren Wichmann, for which I would like to express my gratitude for his comments on my translations and his linguistic insights long after those semesters at University as a student came to an end.

All in this book that adds to the outlets of human curiosity would not be here without the help of many. I would like to thank Raul Macuil Martínez for everything he taught me about his language and culture. His insights have been of invaluable support. Early on in this research I had to find out that ethnographic fieldwork was not exactly my strong point. However, traveling to Mexico and specifically to San Luís Potosí and Matlapa could not have been possible without the support of Anuschka van 't Hooft, Lourdes, Patrícia, Fela, Nery, Amalia, Lucero, Yolanda and Juan. I also thank don Eutiquio González Cruz, his wife doña Ignacia Lora Gudiño, don Miguel Morale Gallegos and don Victoriano Castillo Hernández. They invited me into their homes and allowed me to have a glimpse of their experience and knowledge as *curanderos* in the 21th century. It was a journey that guided my research into the document I have here before me.

I would like to thank the kind members of the Tropenmuseum for their willingness to show me the manuscript in person on several occasions, and for giving me the opportunity to read every note on Izcatqui from the archival record. Also thank you to curator of Middle and South America of the Museum of Ethnology Martin Berger and exhibition creator Rik Herder. In 2016 and 2017 Izcatqui was on display for the public at the Museum of Ethnology in Leiden. The museum truly is custodian of a gem in world history.

This research would not have been conducted without the support of Leiden's Research Area, "Global Interactions". I had the pleasure to work with a diverse group of scholars that gave four PhD students the opportunity to learn from their knowledge and expertise.

I could not have taken this research to the finish line without words of encouragement and support of dear friends. I would especially like to thank Benjamin, Marjolein, Elisabeth and Araceli. Lieke, Marijke, Tine, Jonna, Marieth and Ingeborg, you have witnessed this process from a bit farther away, but you are equally important to me. I love each and every one of you. Just so you know. And thank you Luís, for bearing me in the most stressful times and for your support. I would also like to thank my former fellows at the Faculty of Archaeology, and in particular Ludo, Paul, Alessia, Martin, Wen Li, Caroll, Caroline, Tomomi and Barbara. I am grateful to have experienced a good number of years of academic and personal growth with each of you. In addition, I felt supported by the group of researchers in the ERC project "Time in Intercultural Context: The Indigenous Calendars of Mexico and Guatemala" led by Professor dr. Maarten Jansen and Gabina Aurora Pérez Jiménez. And lastly, Pascal, without you this book would never even have been printed in the first place, thank you for helping me overcome essential lay-out issues.

I am forever indebted to my parents, Peter and Lia who have supported me on more levels than they are probably aware of. I thank you for your trust, positivity and always being proud of me, no matter what. From across the Atlantic Ocean, I felt the same support from my brother Alex, his wife

Olga and my beautiful niece Zoe. Traveling to Seattle on several occasions has always been nothing short of a feast and I hope to spend more quality time with you in the upcoming years.

Family Hoedjes witnessed a great deal of the making of this dissertation. I would like to thank Joost, Peter and Mieke, Katja and Jos, Aletta and Agnes for those wonderful weekends up north. You have always made me feel at home just as much as I do down south.

And then my sweet Tijn. You were born 2,5 years into my research. I can easily say that you have taught me more than any textbook ever could. I can only hope to return that favor as you grow into an even sweeter, funnier, and happier boy than you already are.

## A Note on Transcription and Translation

The dissertation presents a selection of transcriptions and translations of parts of ms 3523-2. Rather than providing a transcription spanning cover to cover, I have selected those fragments that to me have revealed the most significant information for each of the themes presented in the following text, according to my best ability to translate them. Furthermore, I have deliberately directed my selection process towards the respective aims of:

- 1) the identification of source texts; and thus similarities between ms 3523-2 and texts that were consulted prior and during the production of the manuscript;
- 2) adaptations or alterations: and thus dissimilarities between ms 3523-2 and source texts;
- 3) to try and understand how European texts were interpreted in a Mesoamerican context and exploring ways of how its makers dealt with the issue of “untranslatability” of foreign concepts.

Considering ms 3523-2 as a whole, translations that have not been presented in the transcription/translation format were just as much of value in order to understand its content; my rendering of them are presented in the format of a descriptive text. I am aware that the aims mentioned above, lead to a specific and subjective interpretation of *parts* of the manuscript under study.

Transcriptions are provided with several alterations to the original text with the aim to produce a text that is easy to follow, also for those who are not familiar with the language of Classical Nahuatl. I have omitted full stops; abbreviated words are written in full text and are indicated by [...]. I have added spacing between certain words that are glued together in the text itself (a common feature in Nahuatl writing) for reasons of readability; for example *yninmacehual* becomes *ynin macehual* [lit: this one commoner]. In addition, and also to enhance readability, I present transcriptions and translations as how I would read and understand sentences that make sense and are complete. I do present lines as they follow one another in the text. Thus, where one line stops and the next commences, I use a [/] so the reader is aware of the length of lines in the original text. Unreadable parts due to damages of the page are indicated by [/.../] and wherever I felt reconstructions could be made, I have added text in between [/.../] (for example *ygle/sia/*).

Translations are provided in English; my deepest gratitude to Dr. Raul Macuil Martínez, Dr. Søren Wichmann and Professor dr. Maarten Jansen for their help in both translations and corrections of my translations. Their contributions have been of tremendous value. I take full responsibility for any mistranslations of Raul's Spanish feedback as well as for mistranslations of the Nahuatl text that remain in my dissertation. For readability's sake, I have chosen to present transcriptions and translations in columns side by side, and to exclude a linguistic analysis. By doing so, I am implicitly asking the reader to trust my capabilities to translate this Nahuatl text. As a way of compensating this as well as illustrating how I have reached towards my translations, I have added three appendices that do include a linguistic analysis of Nahuatl.
