“Due to my language disorder I have too much information in my head. It feels as if my head is mixed up. I have pictures in my head, but then I don't know the words anymore”

“If I really have to tell a story about what I once experienced, then I mix up the order. Or then I say something and I come up with a completely different story and then I have to go back again.”

Do you find language difficult?

“Yes, and spelling and reading and reading comprehension ... and gym. I have that during gym too. They talk too quickly and I don't know what they want me to do.”
