Universiteit Utrecht

The research described in this thesis is financed by the Trombosesstichting Nederland (#2015-4). The Landsteiner Foundation for Blood Transfusion Research (#1503) provided additional financial support.

Financial support from the Trombosesstichting Nederland for the publication of this thesis is gratefully acknowledged.

Table of contents

Chapter 1	General introduction and outline of the thesis	7
Chapter 2	Characterization of hemostasis in mice lacking the novel thrombosis susceptibility gene <i>Slc44a2</i>	27
Chapter 3	SLC44A2 deficient mice have a reduced response in stenosis but not in hypercoagulability driven venous thrombosis	47
Chapter 4	Plasma protein signatures of a murine venous thrombosis model and <i>Slc44a2</i> knockout mice using quantitative-targeted proteomics	81
Chapter 5	SLC44A2/HNA3a is involved in neutrophil adhesion and activation to VWF in human and mice	117
Chapter 6	General discussion and perspectives	139
Chapter 7	Nederlandse samenvatting	157
Appendix	Curriculum Vitae	163
	Publications	165
	Dankwoord	166
