TABLE OF CONTENTS

Chapter 1	General introduction	9
Chapter 2	Complement component C1q is locally produced by isolated articular chondrocytes	25
Chapter 3	Complement C3 cleavage by Cathepsin-L leads to formation of C3a-desArg and is not essential for survival in a HAP-1 model cell line	45
Chapter 4	Complement component C1q as serum biomarker to detect active tuberculosis	69
Chapter 5	Analysis of the endogenous complement regulator C1-inhibitor, the product of <i>SERPING1</i> , in active tuberculosis	93
Chapter 6	Systemic and pulmonary C1q as biomarker of progressive disease in experimental non-human primate tuberculosis	113
Chapter 7	Complex medical history of a lupus patient with a compound heterozygous mutation in <i>C1QC</i>	139
Chapter 8	Carbamylation reduces capacity of IgG for hexamerisation and complement activation	151
Chapter 9	Summary and general discussion	173
Addendum	Nederlandse samenvatting	190
	Curriculum Vitae	197
	List of publications	198
	Acknowledgements	201
