Cover design: 'the beauty of Leiden and Makassar' by Andika Suyata

“The most interesting information comes from children,
for they tell all they know and then stop”
(Mark Twain 1835-1910)

Contents

Chapter 1	General introduction	7
Chapter 2	Comparison of an enzyme linked immunosorbent assay (ELISA) and a radioallergosorbent test (RAST) for detection of IgE antibodies to <i>Brugia malayi</i>	41
Chapter 3	Anti-filarial and total IgG4 and IgE antibody levels are correlated in mothers and their offspring	51
Chapter 4	Clustering of filarial infection in an age graded study: genetic, household and environmental influences	63
Chapter 5	The performance of ISAAC questionnaires and SPT/serology to assess clinical allergy in Indonesian school children with different socioeconomic status	73
Chapter 6	Asthma and atopy in school children from different socioeconomic backgrounds in Makassar: a study on environment factors, nutritional status and helminth infections	87
Chapter 7	Clustering of allergic outcomes within families and households in areas endemic for helminth infection	99
Chapter 8	Activity of the toll like receptor ligands in children living in areas endemic for intestinal helminth infections	111
Chapter 9	General discussion	123
