The ‘free drug hypothesis’: Fact or fiction?

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 26 november 2008
klokke 11:15 uur

door

Tamara Jessica van Steeg

geboren te Oud-Beijerland
in 1978

Promotiecommissie

Promotor : Prof. Dr. M. Danhof

Co-promotor : Dr. E.C.M. de Lange

Referent : Dr. J.H. Proost
(Rijks Universiteit, Groningen)

Overige leden :Prof. Dr. A.F. Cohen
Prof. Dr. E.R. de Kloet
Prof. Dr. A.P. Ijzerman
Prof. Dr. H.J. Guchelaar
Prof. Dr. J.A. Bouwstra

"God, grant me the serenity to accept the things I cannot change, the courage to change the things I can, and the wisdom to know the difference."

(Reinhold Niebuhr)

Aan Jesca, Danique en ?

The research described in this thesis was performed at the division of pharmacology of the Leiden/Amsterdam Center for Drug Research, Leiden University.

The printing of this thesis was financially supported by:

LAP&P consultants B.V., Leiden, The Netherlands
Pfizer Ltd, Research and Development, Sandwich, United Kingdom

Section I - General introduction

Chapter 1	Scope and outline of thesis	9
Chapter 2	The 'free drug hypothesis' in pharmacodynamics: theoretical evaluation of the role of plasma protein binding	15

Section II - Mechanism-based PKPD modelling of β -blockers

Chapter 3	Pharmacokinetic-Pharmacodynamic modelling of S(-)-atenolol in rats: Reduction of isoprenaline-induced tachycardia as a continuous pharmacodynamic endpoint	37
Chapter 4	Mechanism-based pharmacodynamic modelling of S(-)-atenolol: Estimation of in vivo affinity for the β_1 -adrenoceptor with an agonist-antagonist interaction model	55
Chapter 5	Mechanism-based PKPD modelling of β -adrenoceptor antagonists: Role of plasma protein binding	71

Section III - Challenging the 'free drug hypothesis'

Chapter 6	Reproducible and time-dependent modification of serum protein binding in Wistar Kyoto rats	91
Chapter 7	Challenging the 'free drug hypothesis': Mechanism-based PKPD modelling of altered AGP binding on heart rate effects of S(-)-propranolol in rats	103

Section IV - Summary, conclusions & perspectives

Chapter 8	Challenging the 'free drug hypothesis' - summary, conclusions & perspectives	121
	Nederlandse samenvatting (Synopsis in Dutch)	137
	Nawoord	145
	Curriculum vitae	147
	List of publications	149
