## **Curriculum vitae**

Rianne van der Kleij was born on the 30<sup>th</sup> of June 1985 in Groningen. After finishing her secondary school (athenaeum) in 2003, she studied Psychology and Medicine at Leiden University, the Netherlands. She also followed elective courses at the Leiden University Faculty of Arts and the Royal Conservatory of the Hague. She obtained her master's degree in Health Psychology in 2011. During her studies, she participated in several committees at her fraternity (LVVS Augustinus) and the Psychology Students Association Labyrint. Furthermore, she was a board member of the Psychology Students Association Labyrint and president of the foundation for educational materials (2004-2005). She also participated as a student member of both the Psychology and Medicine educational advisory board.

In 2011, she started her PhD research at the department of Public Health and Primary Care at the Leiden University Medical Centre. Her PhD was part of the Consortium Integrated Approach to childhood Obesity (CIAO) and focussed on the implementation of intersectoral community approaches targeting childhood obesity. Her research was supervised by Prof. dr. Ria Reis, Dr. Matty Crone and Dr. Theo Paulussen. At the moment, Rianne is working as a senior researcher on several research projects covering non-communicable lung disease, palliative care, prevention of unhealthy behaviour and e-health applications. Furthermore, she is the project manager of the Horizon 2020 project FRESH AIR and is employed as a psychologist-coach for the GP vocational training.
