Title: Clinical pharmacological aspects of mitochondrial function in muscle

Issue Date: 2021-01-27

*'Watch your thoughts, for they become words.
Watch your words, for they become actions.
Watch your actions, for they become habits.
Watch your habits, for they become your character.
Watch your character, for it will make your destiny'*

Margaret Thatcher

CLINICAL PHARMACOLOGICAL ASPECTS OF MITOCHONDRIAL FUNCTION IN MUSCLE

PROEFSCHRIFT

ter verkrijging van de graad van Doctor
aan de Universiteit Leiden, op gezag van
Rector Magnificus prof.mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 27 januari 2021
klokke 11:15 uur

DOOR

Marcus Peter Johannes van Diemen
geboren te Haarlem in 1986

PROMOTORES

Prof. dr. A.F. Cohen
Prof. dr. R.G.H.H Nelissen

CO-PROMOTOR

Prof.dr. G.J. Groeneveld

DESIGN

Caroline de Lint, Voorburg (caro@delint.nl)

The research described in this were carried out at the Centre for Human Drug Research and the Leiden University Medical Center, Leiden, The Netherlands.

Publication of this thesis was financially supported by the foundation Centre for Human Drug Research in Leiden, The Netherlands.

TABLE OF CONTENTS

	CHAPTER I
7	Introduction
	CHAPTER II
29	Mitochondrial function is impaired in the skeletal muscle of pre-frail elderly
	CHAPTER III
53	Mitochondrial function, grip strength and activity are related to recovery after a total knee arthroplasty
	CHAPTER IV
75	Validation of a pharmacological model for mitochondrial dysfunction in healthy subjects using simvastatin: a randomized placebo-controlled proof-of-pharmacology study
	CHAPTER V
93	Safety, pharmacokinetics and pharmacodynamics of SBT-020 in patients with early stage Huntington’s disease, a two-part study
	CHAPTER VI
123	Brain bio-energetic state does not correlate to muscle mitochondrial function in Huntington’s disease
	CHAPTER VII
143	Measurement of oxygen metabolism <i>in vivo</i>
	CHAPTER VIII
155	General discussion
171	Nederlandse samenvatting
179	Appendices
