Author: Deng, Y.

Title: Topologies and convergence structures on vector lattices of operators

Issue Date: 2021-02-02

Topologies and convergence structures on vector lattices of operators

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 2 februari 2021
klokke 16.15 uur

door

Yang Deng

geboren te Jingshan
in 1990

Promotores:

Dr. M.FE. de Jeu

Prof. dr. A. Doelman

Promotiecommissie:

Prof. dr. FA. van der Duijn Schouten

Prof. dr. S.J. Edixhoven

Dr. ir. O.W. van Gaans

Prof. dr. B. de Pagter (Technische Universiteit Delft)

Prof. dr. VG. Troitsky (University of Alberta)

This research was carried out at Universiteit Leiden and was funded by China Scholarship Council (CSC) through a research grant awarded to Yang Deng.

Contents

1	Introduction	3
2	Vector lattices with a Hausdorff uo-Lebesgue topology	7
2.1	Introduction and overview	8
2.2	Preliminaries	9
2.2.1	Vector lattices, operators, and (unbounded) order convergence	9
2.2.2	Topologies on vector lattices	12
2.3	Unbounded topologies generated by topologies on ideals	13
2.4	Hausdorff uo-Lebesgue topologies: going up and going down	19
2.5	uo-Lebesgue topologies generated by absolute weak topologies on order dense ideals	22
2.6	Regular vector sublattices of $L_0(X, \Sigma, \mu)$ for semi-finite measures	24
2.7	uo-convergent sequences within $\widehat{\tau}_E$ -convergent nets	27
2.8	Topological aspects of (unbounded) order convergence	36
3	Convergence structures and locally solid topologies on vector lattices of operators	41
3.1	Introduction and overview	42
3.2	Preliminaries	43
3.3	Absolute strong operator topologies on $\mathcal{L}_{\text{ob}}(E, F)$	45
3.4	o-Lebesgue topologies and uo-Lebesgue topologies on vector lattices of operators	49
3.5	Comparing uniform and strong convergence structures on $\mathcal{L}_{\text{ob}}(E, F)$	51
3.6	Orthomorphisms	54
3.7	Continuity properties of orthomorphisms	59
3.8	Topologies on $\text{Orth}(E)$	60
3.9	Comparing uniform and strong convergence structures on $\text{Orth}(E)$	62
4	Convergence structures and Hausdorff uo-Lebesgue topologies on vector lattice algebras of operators	71
4.1	Introduction and overview	72
4.2	Preliminaries	73
4.3	Implications between convergences on vector lattices of operators	77
4.4	Continuity of left and right multiplications	79

4.5 Simultaneous continuity of multiplications and adherences of subalgebras of $\mathcal{L}_{\text{ob}}(E)$ 86

4.6 Equality of adherences of vector sublattices 92
