Author: Ziemlańska, M.A.
Title: Approach to Markov Operators on spaces of measures by means of equicontinuity
Issue Date: 2021-02-10

Acknowledgments

First, I would like to thank my supervisor Dr. Sander Hille. Without long hours of conversations and effort you put into my PhD project this thesis would never come to life. Second I would like to thank Prof. Dr. Tomasz Szarek, who recommended me for this position. And who, as co-author, by his expertise and passion for the topic, was a source of many inspiring results. My thanks go to my promotor Prof. Dr. Arjen Doelman for bringing the Analysis Group together. I would also like to thank my office mates Eric, Lotte, Bjorn, Corine, Leonardo and Claudiu. From among the staff I would like to thank Martina and Hermen-Jan for all the supportive discussions.

Finally I would like to thank the people closest to me. My parents, sisters and grandma for always believing in me. Iza and Pawel, who stayed there for me even though I moved far away. My parents-in-law, Eric and Pinar for becoming my family. And finally, Jos and Julian. I didn't know you before moving to The Netherlands but now I cannot imagine life without the two of you.

Curriculum vitae

Maria Aleksandra Ziemlańska was born in Gdańsk, Poland in 1985. After graduating from high school in 2003, she studied Biotechnology at Gdańsk Technical University. In 2006 she started her bachelor studies in pure mathematics at Gdańsk University and in 2009 she obtained a Bachelor of Science in Mathematics. She continued her master studies in financial Mathematics and in 2011 she obtained a Master of Science in Mathematics . She wrote her Master's thesis under the title *Option pricing in continuous time*. In 2014 she moved to the University of Leiden and started a PhD research under the supervision of dr. Sander C. Hille, funded by a Huygens Fellowship.
