Proefschrift

ter verkrijging van de graad van Doctor aan de Universiteit Leiden, op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker, volgens besluit van het College voor Promoties te verdedigen op dinsdag 3 november 2020 klokke 16.15 uur

door

Berend Jan van Meer geboren te Bloemendaal in 1988

Promotor	Prof. dr. C.L. Mummery
Co-promotor	Dr. L.G.J. Tertoolen
Promotiecommissie	Prof. dr. M.J.T.H. Goumans Prof. dr. D.E. Atsma Prof. dr. A.P. IJzerman Prof. dr. ir. R. Dekker Prof. dr. J. Bakkers

This research was conducted at the Department of Embryology & Anatomy of the Leiden University Medical Center, the Netherlands. It was supported by research grants from the European Research Council, the National Centre for the Replacement, Refinement and Reduction of Animals in Research and the Dutch Research Council.

Publication of this thesis was financally supported by Stichting Proefdiervrij, the Dutch Heart Foundation and the Willy van Heumenfonds.

Aan mijn ouders, voor oneindig veel vertrouwen

Table of contents

General introduction 8 1 Measuring physiological responses of human pluripotent 20 2 stem cell derived cardiomyocytes to drugs and disease MUSCLEMOTION: a versatile open software tool to 40 3 quantify cardiomyocyte and cardiac muscle contraction in vitro and in vivo Quantification of muscle contraction in vitro and in vivo 4 74 using MUSCLEMOTION software: from stem cell-derived cardiomyocytes to zebrafish and human hearts Simultaneous measurement of excitation-contraction 104 5 coupling parameters identifies mechanisms underlying contractile responses of hiPSC-derived cardiomyocytes Blinded, multi-centre evaluation of drug-induced changes 138 6 in contractility using human induced pluripotent stem cell-derived cardiomyocytes Cytostretch, an Organ-on-Chip platform 200 Small molecule absorption by PDMS in the context of 224 drug response bioassays General discussion and future perspectives 240 Q Summary 250 Nederlandse samenvatting 254 **Curriculum vitae** 258
