Title: Measures and matching for number systems
Issue Date: 2021-03-04

Measures and Matching for Number Systems

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus Prof. Dr. Ir. H. Bijl,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 4 maart 2021
klokke 10.00 uur

door

Marta Maggioni
geboren te Calco, Italië
in 1992

Samenstelling van de promotiecommissie:

Promotoren:

Prof. Dr. W.T.F. den Hollander
Dr. C.C.C.J. Kalle

Promotiecommissie:

Prof. Dr. F.A. van der Duijn Schouten
Prof. Dr. R.H.M. Merks
Dr. W. Bahsoun (Loughborough University)
Prof. Dr. A.J. Homburg (VU University Amsterdam)
Prof. Ing. E. Pelantová (Czech Technical University Prague)

This thesis has been financed by the Dutch Research Council (NWO) through the NWO TOP-Grant No. 614.001.509.

The cover has been realised by the author using the graphic software of Canva.

*“Sarebbe questa la libertà?
Esistere, lentamente, dolcemente,
come questi alberi,
come una pozza d’acqua,
come il sedile rosso del tram.”*

Jean-Paul Sartre, La nausea

Contents

1	Dynamical Systems	9
§1.1	Motivation and context	10
§1.2	Discrete dynamical systems	12
§1.2.1	Deterministic	12
§1.2.2	Random	15
§1.2.3	Infinite	16
§1.3	Number systems	18
§1.3.1	β -expansions	20
§1.3.2	Lüroth series	22
§1.3.3	Continued fractions	24
§1.4	Outline	26
2	Random c-Lüroth Expansions	29
§2.1	Motivation and context	30
§2.2	Random c -Lüroth transformations	35
§2.3	Approximations of irrationals	41
§2.3.1	Universal generalised Lüroth expansions	41
§2.3.2	Speed of convergence	43
§2.3.3	Approximation coefficients	47
§2.4	Generalised Lüroth expansions with bounded digits	50
§2.4.1	Uncountably many universal expansions	52
§2.4.2	Explicit expressions for invariant densities	59
§2.5	Remarks	67
3	Measures for Random Systems	69
§3.1	Motivation and context	70
§3.2	Affine random interval systems	71
§3.3	The matrix equation	74
§3.4	An explicit formula for invariant measures	80
§3.5	All invariant measures	86
§3.6	Examples	96
§3.6.1	Random tent maps	96
§3.6.2	A random family of W -shaped maps	98
§3.6.3	Random β -transformations	99
§3.6.4	The random (α, β) -transformation	102

§3.7 <i>c</i> -Lüroth expansions	103
§3.8 Remarks	106
4 Matching for flipped α-CF	109
§4.1 Motivation and context	110
§4.2 More CF-maps	114
§4.2.1 Semi-regular CF-expansions	114
§4.2.2 AFN-maps	115
§4.3 Matching almost everywhere	117
§4.4 Natural extensions	122
§4.4.1 For $\alpha < \frac{1}{2}$	123
§4.4.2 For $\alpha \geq \frac{1}{2}$	126
§4.5 Entropy, wandering rate and isomorphisms	127
§4.6 Remarks	132
5 Matching and Measure for Random Systems	135
§5.1 Motivation and context	136
§5.2 Random matching	138
§5.3 Examples	143
§5.3.1 Random signed β -transformations	143
§5.3.2 Random CF-maps	147
§5.4 Random transformations and expansions	152
§5.4.1 Random symmetric doubling maps	152
§5.4.2 Random matching almost everywhere	154
§5.4.3 A formula for the stationary measure	159
§5.4.4 Minimal weight expansions	161
§5.5 Final remarks	168
§5.5.1 On the symmetric doubling maps	168
§5.5.2 On random CF-maps	169
§5.6 Appendix	171
Bibliography	178
Samenvatting	187
Acknowledgements	190
Curriculum Vitae	191
Index	193
