Shaping the pharmacokinetic landscape for renally cleared antibiotics in obesity

Studies in adults, adolescents and children

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus Prof.dr.ir. H. Bijl,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 11 maart 2021
klokke 15.00 uur

door

Cornelis Smit
geboren te Menaldum, Nederland
in 1988

Promotor

Prof. dr. C.A.J. Knibbe

Co-promotores

dr. H.P.A. van Dongen

St. Antonius Ziekenhuis, Nieuwegein

dr. R.J.M. Brüggemann

Radboudumc, Nijmegen

Promotiecommissie

Prof. dr. H. Irth (voorzitter)

Prof. dr. J.A. Bouwstra (secretaris)

Prof. dr. J.N. van den Anker

Children's National Hospital, Washington, DC, USA

University of Basel Children's Hospital, Basel, Switzerland

dr. J.G.C. van Hasselt

Prof. dr. H.J. Guchelaar

Prof. dr. D.W. de Lange

UMC Utrecht

TABLE OF CONTENTS

Part I Introduction and background		
Chapter 1	Introduction	9
Chapter 2	Obesity and drug pharmacology: A review of the influence of obesity on pharmaco-kinetic and pharmacodynamic parameters	27
Part II Studies on obesity in otherwise healthy individuals		
Chapter 3	A prospective clinical study characterizing the influence of morbid obesity on the pharmacokinetics of gentamicin: towards individualized dosing in obese patients	55
Chapter 4	Tobramycin clearance is best described by renal function estimates in obese and non-obese individuals: results of a prospective rich sampling pharmacokinetic study	83
Chapter 5	Population pharmacokinetics of vancomycin in obesity: finding the optimal dose for (morbidly) obese individuals	115
Part III Extension of obesity studies to real-world adult and paediatric populations		
Chapter 6	Dose recommendations for gentamicin in the real-world obese population with varying bodyweight and renal (dys)function	149
Chapter 7	Dosing recommendations for vancomycin in obese children and adolescents with varying renal function based on a population pharmacokinetic study in 1892 children aged 1 – 18 years	179
Part IV Main findings, considerations and perspectives		
Chapter 8	Shaping the landscape for renally cleared antibiotics in obesity: main findings, considerations and perspectives	215
Chapter 9	Dutch summary	237
Part V Appendices		
	Dose recommendations presented in this thesis	255
	Curriculum vitae	263
	List of publications	267
	Affiliation of authors	273
	Dankwoord - Acknowledgements	277
