Author: Dijk, B. van

Title: The role and analysis of molecular systems in electrocatalysis

Issue Date: 2021-03-10

The role and analysis of molecular systems in electrocatalysis

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus Prof.dr.ir. H. Bijl,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 10 maart 2021
klokke 11:15 uur

door

Bas van Dijk

geboren te Heemskerk in 1992

Promotiecommissie:

Promotoren

dr. D. G. H. Hetterscheid

prof. dr. M. T. M. Koper

Overige commissieleden

prof. dr. H. S. Overkleeft (voorzitter)

prof. dr. E. Bouwman (secretaris)

dr. M. Costa Figueiredo (Technische Universiteit Eindhoven)

prof. dr. A. Macchioni (Università degli Studi di Perugia)

Financial support was provided by the European Research Council and the Leiden Institute of Chemistry

Print: Ipskamp Drukkers B.V., Enschede

ISBN: 978-94-6421-215-0

Table of contents

Chapter 1	Introduction to the role and analysis of molecular systems as electrochemical catalysts.	7
Chapter 2	The influence of the ligand in the iridium mediated electrocatalytic water oxidation.	41
Chapter 3	Pinpointing the active species of the Cu(DAT) catalyzed oxygen reduction reaction	69
Chapter 4	A selective molecular dinuclear copper oxygen reduction catalyst for the electrochemical synthesis of H ₂ O ₂ at neutral pH	89
Chapter 5	Mechanistic insight from structure–activity studies in the electrochemical oxygen reduction by substituted tris(2-pyridylmethyl)amine copper complexes	115
Chapter 6	Summary and conclusion	143
Appendices		
	A: Supplementary information for Chapter 2	153
	B: Supplementary information for Chapter 3	167
	C: Supplementary information for Chapter 4	191
	D: Supplementary information for Chapter 5	205
Samenvatting		217
Curriculum Vitae		227
List of publications		229
Acknowledgements		231
