Solvent tolerance mechanisms in *Pseudomonas putida*

Proefschrift

ter verkrijging van

de graad van Doctor aan de Universiteit Leiden,

op gezag van Rector Magnificus Prof.dr.ir. H. Bijl,

volgens besluit van het College voor Promoties

te verdedigen op Donderdag 11 Maart 2021

klokke 16.15 uur

door

Hadiastri Kusumawardhani

geboren te Bandung, Indonesia

in 1991

Promotor: Prof. dr. J. H. De Winde

Co-promotor: Dr. Rohola Hosseini

Promotiecommissie: Prof. dr. Gilles P. van Wezel

Prof. dr. Ariane Briegel

Prof. dr. Nick Wierckx

Prof. dr. Miriam Agler-Rosenbaum

Dr. Hermann J. Heipieper

Table of Contents

CHAPTER 1 Aim and scope of this thesis **7**

Pseudomonas putida S12 as a solvent-tolerant bacterial strain 8

Scope and outline of this thesis 9

CHAPTER 2 Introduction **15**

Solvent Tolerance in Bacteria: Fulfilling the Promise of the Biotech Era?

Abstract 16

Solvent tolerant bacteria are efficient biocatalysts 17

Current understanding of solvent tolerance mechanisms 18

Applications of solvent-tolerant bacteria in biocatalysis of valuable compounds 24

Synthetic biology and engineering towards advanced biocatalysts 28

Concluding Remarks and Future Perspectives 34

CHAPTER 3 **47**

Comparative analysis reveals the modular functional build-up of megaplasmid pTTS12 of *Pseudomonas putida* S12: a paradigm for transferable traits, plasmid stability and inheritance?

Abstract 48

Introduction 49

Results 50

Discussion 62

Materials and methods 65

Supplementary Materials 74

CHAPTER 4 **79**

A novel toxin-antitoxin module SlvT–SlvA regulates megaplasmid stability and incites solvent tolerance in *Pseudomonas putida* S12

Abstract 80

Importance 80

Introduction 81

Results 82

Discussion 95

Supplementary Materials 110

CHAPTER 5 **121**

Adaptive laboratory evolution restores solvent tolerance in plasmid-cured *Pseudomonas putida* S12; a molecular analysis

Abstract 122

Introduction 123

Materials and Methods 124

Results 128

Discussion 138

Supplementary Materials 147

CHAPTER 6 **157**

Characterization of an AraC family transcriptional regulator Afr in *Pseudomonas putida* S12

Abstract 158

Introduction 159

Results 160

Discussion 166

Materials and Methods 169

CHAPTER 7 Discussion **179**

Pseudomonas putida as a robust microbial host for the production of high-value chemicals 180

Immediate and adaptive responses are required to circumvent solvent toxicity 180

Solvent tolerance mechanisms in Pseudomonas putida S12 181

Regulating solvent tolerance mechanisms 186

Conclusion and future outlook 187

Summary **195**

Samenvatting **197**

Ringkasan **200**

Curriculum vitae **203**

Publications **204**
