Title: From molecules to monitoring: integrating genetic tools into freshwater quality assessments

Issue Date: 2021-04-08

FROM MOLECULES TO MONITORING

Integrating genetic tools into
freshwater quality assessments

Kevin K. Beentjes

Kevin K. Beentjes, 2021. From molecules to monitoring: Integrating genetic tools into freshwater quality assessments.

PhD thesis, University of Leiden, The Netherlands

ISBN: 978-94-6423-157-1

Layout and cover design by Kevin K. Beentjes

Printed by ProefschriftMaken

This research was carried out at Naturalis Biodiversity Center and the Institute of Biology Leiden at Leiden University. It was part of the project DNA Waterscan, funded by the Gieskes-Strijbis Fonds.

FROM MOLECULES TO MONITORING
Integrating genetic tools into freshwater quality assessments

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden
op gezag van rector magnificus prof.dr.ir. H. Bijl
volgens besluit van het college voor promoties
te verdedigen op donderdag 8 april 2021
klokke 10:00 uur

CONTENTS

CHAPTER 1	9
General introduction and literature review	
CHAPTER 2	35
The influence of macroinvertebrate abundance on the assessment of freshwater quality in the Netherlands	
CHAPTER 3	47
Increased performance of DNA metabarcoding of macroinvertebrates by taxonomic sorting	
CHAPTER 4	73
The effects of spatial and temporal replicate sampling on eDNA metabarcoding	
CHAPTER 5	95
Environmental DNA metabarcoding reveals comparable responses to agricultural stressors on different trophic levels of a freshwater community	
CHAPTER 6	123
General discussion and synthesis
