Novel pathways in cholesterol metabolism to combat cardiometabolic diseases

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus Prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 28 april 2021
klokke 10:00 uur

door

Enchen Zhou

geboren te Gongzhuling, China
in 1991

PROMOTORES

Prof. dr. P.C.N. Rensen

Prof. dr. Y. Wang (Xi'an Jiaotong University, Xi'an, China)

PROMOTIECOMMISSIE

Prof. dr. J.A.P. Willems van Dijk

Prof. dr. M.P.J. de Winther (AUMC, Amsterdam)

Prof. dr. R. Shiri-Sverdlov (MUMC, Maastricht)

The work described in this thesis was performed at the Department of Medicine, Division of Endocrinology of the Leiden University Medical Center, Leiden, the Netherlands.

Enchen Zhou was supported by the China Scholarship Council (CSC, grant 201606010321).

Table of contents

Chapter 1	General introduction and outline	1
Chapter 2	Beneficial effects of brown fat activation on top of PCSK9 inhibition with alirocumab on dyslipidemia and atherosclerosis development in APOE*3-Leiden.CETP mice	23
Chapter 3	Hepatic SRB1 knockdown reduces atherosclerosis and enhances the anti-atherosclerotic effect of brown fat activation in APOE*3-Leiden.CETP mice	47
Chapter 4	Colesevelam enhances the beneficial effects of brown fat activation on hyperlipidaemia and atherosclerosis development	79
Chapter 5	Inhibition of $\Delta 24$ -dehydrocholesterol reductase activates pro-resolving lipid mediator biosynthesis and inflammation resolution	109
Chapter 6	Inhibition of $\Delta 24$ -dehydrocholesterol reductase ameliorates diet-induced hepatic steatosis and inflammation through LXR α without inducing hyperlipidemia	149
Chapter 7	FXR activation resolves dyslipidemia and decreases adiposity in APOE*3-Leiden.CETP-transgenic mice fed a Western-type diet	177
Chapter 8	General discussion and future perspectives	199
Chapter 9	Summary	213
	Samenvatting	219
	List of publications	223
	Curriculum Vitae	225
	Acknowledgements	226
