TABLE OF CONTENTS

Chapter 1	7
General introduction and outline of the thesis	
Chapter 2	27
The burden of invasive aspergillosis in patients with haematological malignancy: a meta-analysis and systematic review	
Chapter 3	51
Relapsed and secondary disease drive the risk profile for invasive aspergillosis prior to stem cell transplantation in patients with acute myeloid leukemia or myelodysplastic syndrome	
Chapter 4	65
A new time-dependent approach for assessment of the impact of invasive aspergillosis on short- and long-term survival of patients with haematological malignancy	
Chapter 5	99
Managing invasive aspergillosis in haematological patients in the era of resistance PCR and increasing triazole resistance: a modelling study of different strategies	
Chapter 6	99
Outpatient Parenteral Antifungal Therapy (OPAT) for invasive fungal infections with intermittent dosing of liposomal amphotericin B	
Chapter 7	115
Validation of a clinical decision rule for selecting empiric treatment for invasive aspergillosis in a setting with high triazole resistance	
Chapter 8	133
Summary and general discussion	
Nederlandse samenvatting	147
Curriculum Vitae	157
Nawoord	161
List of publications	165
