Table of Contents

Chapter 1	Introduction	9
Part I: New insights in the epidemiology of <i>Clostridioides difficile</i> and multidrug resistant organisms		
Chapter 2	Detection of <i>Clostridium difficile</i> in feces of asymptomatic patients admitted to the hospital	61
Chapter 3	Prevalence of colistin resistance gene (<i>mcr-1</i>) containing Enterobacteriaceae in feces of patients attending a tertiary care hospital and detection of a <i>mcr-1</i> containing, colistin susceptible <i>Escherichia coli</i>	81
Chapter 4	Spread of ESBL-producing <i>Escherichia coli</i> in nursing home residents in Ireland and the Netherlands may reflect infrastructural differences	97
Part II: The initiation of the Netherlands Donor Feces Bank to facilitate quality assured faecal microbiota transplantation		
Chapter 5	How to: Establish and run a stool bank	113
Chapter 6	Feces microbiota transplantation for <i>Clostridioides difficile</i> infection: four years' experience of the Netherlands Donor Feces Bank	135
Chapter 7	Human transmission of <i>Blastocystis</i> by Fecal Microbiota Transplantation without development of gastrointestinal symptoms in recipients	165
Chapter 8	Fecal microbiota transfer for multidrug resistant Gram-negatives; a clinical success combined with microbiological failure	185
Chapter 9	Discussion	195
	Nederlandse samenvatting	255
	List of publications	262
	Curriculum vitae	268
