Novel diagnostics and therapeutics to prevent injury in native and transplanted kidneys

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 7 september 2021
klokke 15.00 uur

door
Koen Edwin Groeneweg
geboren te Moerhuizen
in 1991

Promotores:

Prof. dr. J.W. de Fijter
Prof. dr. M.E.J. Reinders

Copromotor:

Dr. R. Bijkerk

Leden promotiecommissie:

Prof. dr. F.H.J. Claas
Prof. dr. C.M. Cobbaert
Prof. dr. B.C. Fellström (Uppsala University)
Prof. dr. J.J. Homan van der Heide (Amsterdam UMC)
Prof. dr. C. van Kooten
Prof. dr. A.J. van Zonneveld

Financial support by the Nederlandse Transplantatie Vereniging (Dutch Transplant Association) for the publication of this thesis is gratefully acknowledged.

Table of Contents

Chapter 1	General introduction and outline	7
Chapter 2	Serum TIMP-2, but not IGFBP7, levels remain high despite successful simultaneous pancreas-kidney transplantation, indicative of persistent vascular injury <i>Submitted</i>	17
Chapter 3	Diabetic nephropathy alters circulating long noncoding RNA Levels that normalize following simultaneous pancreas-kidney transplantation <i>American Journal of Transplantation</i>	31
Chapter 4	Circulating long noncoding RNA LNC-EPHA6 associates with acute rejection after kidney transplantation <i>International Journal of Molecular Sciences</i>	51
Chapter 5	Single antigen testing to reduce early antibody-mediated rejection risk in female recipients of a spousal donor kidney <i>Transplant Immunology</i>	65
Chapter 6	Autologous bone marrow derived mesenchymal stromal cell therapy with early tacrolimus withdrawal: the randomized prospective, single-center, open-label TRITON study <i>American Journal of Transplantation</i>	83
Chapter 7	Summary and general discussion	113
Chapter 8	Addendum Dutch summary - Nederlandse samenvatting Curriculum vitae List of publications Dankwoord	123
