The research described in this thesis was performed at the Institute for Translational Vaccinology, Intravacc (Bilthoven, the Netherlands) and the division BioTherapeutics of the Leiden Academic Centre for Drug Research (LACDR), Leiden University (Leiden, The Netherlands). The research was financially supported in part by the Vac2Vac project supported by the Innovative Medicines Initiative² Joint Undertaking under grant agreement N-115924 and by the Ministry of Agriculture, Nature, and Food Quality, the Netherlands.
