Title: Ductal carcinoma in situ and invasive breast cancer: diagnostic accuracy and prognosis

Issue Date: 2021-09-09

**Ductal carcinoma in situ and
invasive breast cancer:
diagnostic accuracy and prognosis**

Maartje van Seijen

The work presented in this thesis was performed at the Netherlands Cancer Institute – Antoni van Leeuwenhoek, Amsterdam, The Netherlands, in cooperation with Leiden University Medical Center, the Netherlands Comprehensive Cancer Organisation (IKNL) and the nationwide network and registry of cytopathology and histopathology in the Netherlands (PALGA) foundation.

The research was funded by the PRECISION initiative, a recipient of a Cancer Research UK Grand Challenge Award 2017, jointly funded by Cancer Research UK and the Dutch Cancer Society (KWF) (grant number C38317/A24043).

Financial support for publication of this thesis was kindly provided by The Netherlands Cancer Institute- Antoni van Leeuwenhoek and the Netherlands Comprehensive Cancer Organisation (IKNL).

Table of contents

Chapter 1.	Scope of the thesis	7
Ductal carcinoma in situ: diagnostic accuracy and prognosis		
Chapter 2.	Ductal carcinoma in situ: to treat or not to treat, that's the question	15
Chapter 3.	Variability in grading of ductal carcinoma in situ among an international group of pathologists	43
Chapter 4.	Long-term risk of subsequent ipsilateral lesions after a diagnosis of ductal carcinoma in situ	71
Invasive breast cancer: diagnostic accuracy and prognosis		
Chapter 5.	Enrichment of high-grade tumors in breast cancer gene expression studies	91
Chapter 6.	Prognostic value of residual disease after neoadjuvant therapy in HER2-positive breast cancer evaluated by Residual Cancer Burden, Neoadjuvant Response Index and Neo-Bioscore	111
Summarizing discussion		
Chapter 7.	Summarizing discussion and future perspectives	133
Appendices		
	List of abbreviations	145
	Nederlandse samenvatting	147
	About the author	155
	List of publications	157
	Dankwoord	159
