## Table of contents

Chapter 1	General introduction and outline of this thesis	9
<b>Part I</b>	<b>Hospital transfer in breast cancer care</b>	<b>29</b>
Chapter 2	Hospital transfer after a breast cancer diagnosis: a population-based study in the Netherlands of the extent, predictive characteristics and its impact on time to treatment <i>European Journal of Surgical Oncology, 2019</i>	31
Chapter 3	Impact of Second Opinions in Breast Cancer Diagnostics and Treatment: A Retrospective Analysis <i>Annals of Surgical Oncology, 2019</i>	47
<b>Part II</b>	<b>Continuity of the adjuvant chemotherapy pathway</b>	<b>63</b>
Chapter 4	Nationwide population-based study of the impact of immediate breast reconstruction after mastectomy on the timing of adjuvant chemotherapy <i>British Journal of Surgery, 2019</i>	65
Chapter 5	Association between overall survival and initiation of adjuvant chemotherapy beyond 30 days following surgery among patients with triple-negative breast cancer <i>International Journal of Cancer, 2019</i>	81
<b>Part III</b>	<b>Quality assessment of breast reconstruction strategies</b>	<b>97</b>
Chapter 6	Revision incidence after immediate direct-to-implant versus two-stage implant-based breast reconstruction: results from a nationwide breast implant registry <i>Submitted</i>	99
Chapter 7	Breast-contour preserving procedures for early-stage breast cancer: a population- based study of the trends, variation in practice and predictive characteristics in Denmark and the Netherlands <i>Breast Cancer Research and Treatment, 2020</i>	121

Chapter 8	Rates of re-excision and conversion to mastectomy after breast-conserving surgery with or without oncoplastic surgery: a nationwide population-based study <i>British Journal of Surgery, 2020</i>	139
Chapter 9	General discussion and future perspectives	161
Chapter 10	Summary	179
	Nederlandse samenvatting	189
	List of publications	201
	Acknowledgements	205
	Curriculum Vitae	209
