Content

Chapter 1	General introduction	9
	1.1 Depression in women	10
	1.2 The female hormonal status and its implications for onset and course of mood disorders	11
	1.3 The menstrual cycle	12
	1.4 Oral contraceptives	13
	1.5 Stress response system: HPA axis and clinical consequences of chronic stress	15
	1.6 The female reproductive system and the stress response system interact	17
	1.7 The corticosteroid receptors	18
	1.8 The human MR (NR3C2) gene and the MR haplotype	21
	1.9 This PhD project	24
Chapter 2	Oral contraceptives may alter the detection of emotions in facial expressions	31
Chapter 3	Mineralocorticoid receptor haplotype, oral contraceptives and emotional information processing	41
Chapter 4	Mineralocorticoid receptor haplotype moderates the influence of oral contraceptives and menstrual cycle on emotional information processing	61
Chapter 5	Mineralocorticoid receptor haplotype, estradiol, progesterone and emotional information processing	75
Chapter 6	Oral contraceptives positively affect mood in healthy PMS-free women: a longitudinal study.	97
Chapter 7	Influence of mineralocorticoid receptor haplotype and female hormonal status on resting-state electroencephalography	117

Chapter 8	General discussion	137
	8.1 Aim of this thesis	138
	8.2 Main effects of the female hormonal status	138
	8.3 Main effects of MR gene variation	145
	8.4 Main outcomes of the interaction between MR gene variation and the female hormonal status	151
	8.5 Methodological considerations and suggestions	156
	8.6 Final conclusions	163
Chapter 9	References	168
	English summary	193
	Dutch summary	204
	About the author & Publications	216
	Dankwoord	218

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for the increase in the number of people employed in the public sector. One reason is that the public sector has become a major employer in the UK. Another reason is that the public sector has become a major employer in the health care sector. A third reason is that the public sector has become a major employer in the social care sector.

The increase in the number of people employed in the public sector has led to a number of changes in the way that the public sector is organized. One change is that the public sector has become more decentralized. Another change is that the public sector has become more customer-oriented. A third change is that the public sector has become more performance-oriented.

The increase in the number of people employed in the public sector has also led to a number of changes in the way that the public sector is funded. One change is that the public sector has become more dependent on government funding. Another change is that the public sector has become more dependent on private funding. A third change is that the public sector has become more dependent on user fees.

The increase in the number of people employed in the public sector has also led to a number of changes in the way that the public sector is managed. One change is that the public sector has become more professionalized. Another change is that the public sector has become more unionized. A third change is that the public sector has become more corporatized.

The increase in the number of people employed in the public sector has also led to a number of changes in the way that the public sector is regulated. One change is that the public sector has become more subject to government regulation. Another change is that the public sector has become more subject to private regulation. A third change is that the public sector has become more subject to user regulation.

The increase in the number of people employed in the public sector has also led to a number of changes in the way that the public sector is evaluated. One change is that the public sector has become more subject to government evaluation. Another change is that the public sector has become more subject to private evaluation. A third change is that the public sector has become more subject to user evaluation.

The increase in the number of people employed in the public sector has also led to a number of changes in the way that the public sector is perceived. One change is that the public sector has become more respected. Another change is that the public sector has become more respected. A third change is that the public sector has become more respected.
