Prof. Dr. K. de Bosscher (UGent/VIB, Gent)

Prof. Dr. L.F.C. van Rossum (EMC, Rotterdam)

## TABLE OF CONTENTS

<b>Chapter 1</b>	General introduction and outline	7
<b>Chapter 2</b>	How metabolic state may regulate fear: presence of metabolic receptors in the fear circuitry	23
<b>Chapter 3</b>	The selective glucocorticoid receptor antagonist CORT125281 has tissue-specific activity	65
<b>Chapter 4</b>	Selective glucocorticoid receptor antagonist CORT125281 activates brown adipose tissue and alters lipid distribution in male mice	93
<b>Chapter 5</b>	Selective glucocorticoid receptor modulation prevents and reverses non-alcoholic fatty liver disease in male mice	93
<b>Chapter 6</b>	Dexamethasone-associated metabolic effects are partially caused by depletion of endogenous corticosterone	151
<b>Chapter 7</b>	Do corticosteroid receptor mRNA levels predict the expression of their target genes?	179
<b>Chapter 8</b>	General discussion and future perspectives	199
<b>Chapter 9</b>	Summary	223
	Samenvatting	229
	List of publications	233
	Curriculum Vitae	235
	Dankwoord	237
