Prof. Dr. L.F.C. van Rossum (EMC, Rotterdam)

TABLE OF CONTENTS

Chapter 1	General introduction and outline	7
Chapter 2	How metabolic state may regulate fear: presence of metabolic receptors in the fear circuitry	23
Chapter 3	The selective glucocorticoid receptor antagonist CORT125281 has tissue-specific activity	65
Chapter 4	Selective glucocorticoid receptor antagonist CORT125281 activates brown adipose tissue and alters lipid distribution in male mice	93
Chapter 5	Selective glucocorticoid receptor modulation prevents and reverses non-alcoholic fatty liver disease in male mice	93
Chapter 6	Dexamethasone-associated metabolic effects are partially caused by depletion of endogenous corticosterone	151
Chapter 7	Do corticosteroid receptor mRNA levels predict the expression of their target genes?	179
Chapter 8	General discussion and future perspectives	199
Chapter 9	Summary	223
	Samenvatting	229
	List of publications	233
	Curriculum Vitae	235
	Dankwoord	237
