Targeting HLA class II in allogeneic stem cell transplantation

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 27 oktober 2021
klokke 15.00 uur

door

Peter van Balen
geboren te Amersfoort
in 1979

Promotor: prof. dr. J.H.F. Falkenburg

Co-promotor: dr. I. Jedema (NKI/AVL, Amsterdam)

Leden promotiecommissie: prof. dr. F. Koning
prof. dr. M. de Haas
prof. dr. J.H.E. Kuball (UMCU, Utrecht)
dr. H. Dolstra (Radboud UMC, Nijmegen)

CONTENTS

Chapter 1	General introduction	9
Chapter 2	Tissue damage caused by myeloablative, but not non-myeloablative, conditioning before allogeneic stem cell transplantation results in dermal macrophage recruitment without active T-cell interaction	23
Chapter 3	CD4 donor lymphocyte infusion can cause conversion of chimerism without GVHD by inducing immune responses targeting minor histocompatibility antigens in HLA class II	45
Chapter 4	Mismatched HLA-DRB3 can induce a potent immune response after HLA 10/10 matched stem cell transplantation	69
Chapter 5	Immunopeptidome analysis of HLA-DPB1 allelic variants reveals new functional hierarchies	83
Chapter 6	Summary and general discussion	111
Appendices	Nederlandse samenvatting	128
	List of publications	134
	Curriculum vitae	138
	Dankwoord	140
