Optimal cardiovascular treatment strategies in kidney disease

Causal inference from observational data

Edouard L. Fu

The work described in this thesis was performed at the Department of Clinical Epidemiology, Leiden University Medical Center, The Netherlands, and the Department of Medical Epidemiology and Biostatistics, Karolinska Institute, Sweden.

E. L. Fu was supported by an MD/PhD grant from the Board of Directors of the Leiden University Medical Center. Part of the research described in this thesis was supported by grants from the Dutch Kidney Foundation (18OKK36) and Eurolife.

Optimal cardiovascular treatment strategies in kidney disease

Causal inference from observational data

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 28 oktober 2021
klokke 16:15 uur

door

Edouard Liang Fu
geboren te Leiden
in 1997

Promotores
Prof. dr. F.W. Dekker
Prof. dr. J.J. Carrero (Karolinska Institute, Sweden)

Co-promotor
Dr. M. van Diepen

Leden promotiecommissie
Prof. dr. W.J.W. Bos
Prof. dr. F.R. Rosendaal
Prof. dr. E.W. Steyerberg
Dr. S.A. Swanson (Erasmus Medical Center, The Netherlands)
Dr. L.A. Tomlinson (London School of Hygiene and Tropical Medicine, United Kingdom)

The printing of this thesis was financially supported by Leiden University Medical Center. Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged.

TABLE OF CONTENTS

Chapter 1.	General introduction and outline of the thesis	9
PART I	**Methodological considerations for causal inference from observational data**	23
Chapter 2.	Pharmacoepidemiology for nephrologists: potential biases and how to overcome them *Clin Kidney J. 2020; 14(5): 1317-1326*	25
Chapter 3.	Merits and caveats of propensity scores to adjust for confounding *Nephrol Dial Transplant. 2019; 34(10): 1629-1635*	49
Chapter 4.	Comment on Kwon et al. The long-term effects of metformin on patients with type 2 diabetic kidney disease *Diabetes Care. 2020; 43(11): e190*	69
PART II	**Clinical applications in kidney disease**	73
Chapter 5.	Association of acute increases in plasma creatinine after renin-angiotensin blockade with subsequent outcomes *Clin J Am Soc Nephrol. 2019; 14(9): 1336-1345*	75
Chapter 6.	Comparative effectiveness of renin-angiotensin system inhibitors and calcium channel blockers in individuals with advanced CKD: a nationwide observational cohort study *Am J Kidney Dis. 2020; 77(5): 719-729*	97
Chapter 7.	Association between β-blocker use and mortality/ morbidity in patients with heart failure with reduced, midrange, and preserved ejection fraction and advanced chronic kidney disease *Circ Heart Fail. 2020; 13(11): e007180*	121
Chapter 8.	Stopping renin-angiotensin system inhibitors in patients with advanced CKD and risk of adverse outcomes: a nationwide study *J Am Soc Nephrol. 2021; 32(2): 424-435*	145

Chapter 9.	When to initiate dialysis to reduce mortality and cardiovascular events in advanced chronic kidney disease: nationwide cohort study *Submitted*	175
Chapter 10.	Summary and general discussion	217
Appendices		231
	Nederlandse samenvatting (Summary in Dutch)	232
	Dankwoord (Acknowledgments)	240
	List of publications	242
	PhD Portfolio	244
	Curriculum vitae	247
