### **Proefschrift**

ter verkrijging van  
de graad van doctor aan de Universiteit Leiden,  
op gezag van rector magnificus prof.dr.ir. H. Bijl,  
volgens besluit van het college voor promoties  
te verdedigen op donderdag 4 november 2021  
klokke 16:15 uur  
door  
Niek Djuric  
geboren te Hilversum  
in 1995

**Promotor** Prof. dr. W.C. Peul

**Co-promotor**

Dr. C.L.A. Vleggeert-Lankamp

**Promotiecommissie**

Prof. dr. S.C. Cannegieter

Prof. dr. J.J.M. van Dongen

Prof. dr. C.M. Cobbaert

Prof. dr. R.W.J.G. Ostelo

Prof. dr. E. Tessitore

(Vrije Universiteit Amsterdam)

(University of Geneva)

## Table of contents

|                             |                                                                                                                                                                      |     |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Chapter 1</b>            | Introduction and general outline                                                                                                                                     | 7   |
| <b>Chapter 2</b>            | The contradictory effect of macrophage related cytokine expression in lumbar disc herniation: a systematic review<br><i>European Spine Journal 2019 Nov 25</i>       | 15  |
| <b>Chapter 3</b>            | Lumbar disc extrusions reduce faster than bulging disc due to an active role of macrophages in sciatica<br><i>Acta Neurochirurgica (2020) 162:79–85</i>              | 37  |
| <b>Chapter 4</b>            | Disc inflammation and Modic changes show an interaction effect on recovery after surgery for lumbar disc herniation<br><i>Eur Spine J. 2019 Nov;28(11):2579-2587</i> | 55  |
| <b>Chapter 5</b>            | Gadolinium enhancement is not associated with disc inflammation in patients with sciatica<br><i>Spine (Phila Pa 1976). 2019 Jun 15;44(12):E742-E748</i>              | 75  |
| <b>Chapter 6</b>            | Influence of different endplate pathologies on the inflammation profile of herniated discs: a proteomic approach<br><i>Submitted</i>                                 | 91  |
| <b>Chapter 7</b>            | Exploring macrophage differentiation in herniated disc tissue in patients with radiculopathy; is this associated with Modic changes?<br><i>Submitted</i>             | 109 |
| <b>Chapter 8</b>            | Conclusion and discussion                                                                                                                                            | 129 |
| <b>Chapter 9</b>            | Study protocol: Effect of infection, Modic and Inflammation on Clinical outcomes in surgery for radiculopathy (EIMICOR)<br><i>Submitted</i>                          | 147 |
| <b>Summary</b>              |                                                                                                                                                                      | 169 |
| <b>Summary in Dutch</b>     |                                                                                                                                                                      | 175 |
| <b>Curriculum Vitae</b>     |                                                                                                                                                                      | 181 |
