TABLE OF CONTENTS

Chapter 1	Introduction and outline of the thesis	7
<i>Part I: Uncertainties and probabilities in empiric antimicrobial therapy</i>		
Chapter 2	Time to positivity of blood cultures supports early re-evaluation of empiric broad-spectrum antimicrobial therapy	19
Chapter 3	Distribution and clinical determinants of time to positivity of blood cultures in patients with neutropenia	41
Chapter 4	Early differentiation between uncomplicated and complicated <i>Staphylococcus aureus</i> bacteraemia: potential value and limitations of a clinical risk score	61
Chapter 5	Using local clinical and microbiological data to develop an institution specific carbapenem-sparing strategy in sepsis: a nested case-control study	79
Chapter 6	Mortality after delay of adequate empiric antimicrobial treatment of bloodstream infection	107
<i>Part II: Decision making in daily clinical practice and antibiotic policy making</i>		
Chapter 7	Determinants of in-hospital antibiotic prescription behaviour: a systematic review and exploration of a theoretical framework	127
Chapter 8	Antimicrobial guidelines in clinical practice: incorporating the ethical perspective	159
Chapter 9	General discussion and summary	189
