## TABLE OF CONTENTS

|                  |                                        |   |
|------------------|----------------------------------------|---|
| <b>Chapter 1</b> | Introduction and outline of the thesis | 7 |
|------------------|----------------------------------------|---|

### *Part I: Uncertainties and probabilities in empiric antimicrobial therapy*

|                  |                                                                                                                                                                |     |
|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Chapter 2</b> | Time to positivity of blood cultures supports early re-evaluation of empiric broad-spectrum antimicrobial therapy                                              | 19  |
| <b>Chapter 3</b> | Distribution and clinical determinants of time to positivity of blood cultures in patients with neutropenia                                                    | 41  |
| <b>Chapter 4</b> | Early differentiation between uncomplicated and complicated <i>Staphylococcus aureus</i> bacteraemia: potential value and limitations of a clinical risk score | 61  |
| <b>Chapter 5</b> | Using local clinical and microbiological data to develop an institution specific carbapenem-sparing strategy in sepsis: a nested case-control study            | 79  |
| <b>Chapter 6</b> | Mortality after delay of adequate empiric antimicrobial treatment of bloodstream infection                                                                     | 107 |

### *Part II: Decision making in daily clinical practice and antibiotic policy making*

|                                 |                                                                                                                               |     |
|---------------------------------|-------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Chapter 7</b>                | Determinants of in-hospital antibiotic prescription behaviour: a systematic review and exploration of a theoretical framework | 127 |
| <b>Chapter 8</b>                | Antimicrobial guidelines in clinical practice: incorporating the ethical perspective                                          | 159 |
| <b>Chapter 9</b>                | General discussion and summary                                                                                                | 189 |
| <b>Nederlandse samenvatting</b> |                                                                                                                               | 203 |
| <b>Nawoord</b>                  |                                                                                                                               | 213 |
| <b>Curriculum vitae</b>         |                                                                                                                               | 219 |
| <b>List of publications</b>     |                                                                                                                               | 223 |
