Acknowledgements	vii
Summary	ix
1 Research scope	1
1.1 Studying antigen processing and presentation	1
1.2 Thesis outline	1
2 Introduction	3
2.1 Mechanisms of antigen processing	6
2.1.1 Endo-lysosomal pathway	6
2.1.2 The role of endo-lysosomal proteases in antigen presentation	7
2.2 Methods of studying antigen processing	8
2.2.1 <i>In vitro</i> and intracellular degradation assays	8
2.2.2 T cell assays	10
2.2.3 Mass spectrometry assays	11
2.3 Summary of limitations of (above) methods	11
2.4 Bioorthogonal chemistry	12
2.4.1 Bioorthogonal reactions	12
2.4.2 Incorporating bioorthogonal groups into proteins	15
2.4.3 Bioorthogonal chemistry during proteolytic degradation	16
3 Bioorthogonal antigens as model for antigen processing and presentation	17
3.1 Introduction	17
3.2 Results	18
3.2.1 Expression of bioorthogonal antigens	20
3.2.2 Characterization of bioorthogonal antigens	21
3.2.3 Visualization of bioorthogonal protein antigens by fluorophore attachment	22
3.2.4 Intracellular degradation of bioorthogonal antigens in antigen presenting cells	22
3.2.5 Antigen presentation of bioorthogonal antigens	24
3.2.6 Comparison with fluorescently pre-labelled ovalbumin	24
3.2.6.1 Biophysical characterization of fluorescently pre-labelled ovalbumin	25
3.2.6.2 T cell activation by fluorescently labelled ovalbumin	27
3.2.6.3 Visualization of fluorescently pre-labelled ovalbumin	27

Contents

3.3 Discussion and conclusion	28
3.4 Materials and methods	31
3.4.1 Materials	31
3.4.2 Methods	33
4 In vitro protein degradation of bioorthogonal antigens	41
4.1 Introduction	41
4.2 Results	44
4.2.1 Post-translational modification of vinculin	46
4.2.2 Analysis of the degradation of bioorthogonal variants	46
4.2.3 Digest of post-translationally modified vinculin variants	49
4.2.4 Digest of carbamylated vinculin variants	49
4.2.5 Digest of citrullinated bioorthogonal vinculin variants	49
4.2.6 Digest of fluorescently labelled bioorthogonal vinculin variants	49
4.3 Discussion and conclusion	53
4.4 Materials and methods	54
4.4.1 Materials	54
4.4.2 Methods	55
5 Bioorthogonal antigens to study intracellular processing of post-translationally modified antigens	59
5.1 Introduction	59
5.1.1 Proteolysis in antigen presenting cells	59
5.1.2 Structure changes antigenicity	60
5.1.3 Post-translational modifications change antigenicity	60
5.1.4 Detectable reporter proteins	60
5.1.5 Bioorthogonal proteins to study antigen degradation	61
5.2 Results	62
5.2.1 Chemical analysis of the modified bioorthogonal recombinant proteins	62
5.2.2 Intracellular degradation in antigen presenting cells	63
5.3 Discussion and conclusion	64
5.4 Materials and methods	65
5.4.1 Materials	65
5.4.2 Methods	66
6 Summary and future perspectives	69
6.1 Summary	69
6.2 Future perspectives	70
6.3 Materials and methods	73
6.3.1 Materials	73
6.3.2 Methods	73
Bibliography	78
List of Figures	107
List of Tables	109
List of Abbreviations	115

Zusammenfassung	125
Περίληψη	129
Samenvatting	131
Curriculum Vitae	133
