The research presented in this thesis was supported by the Netherlands Leprosy Relief Foundation (NLR) and the Leprosy Research Initiative (LRI), both together with the Turing Foundation, The European & Developing Countries Clinical Trials Partnership (EDCTP), the Q.M. Gastmann-Wichers Foundation, the Order of Malta-Grants-for-Leprosy-Research (MALTALEP), the Leiden University Fund (LUF), and the New York Community Trust (NYCT).

Printing of this thesis was financially supported by the Q.M. Gastmann-Wichers Foundation.

Development of immunodiagnostic tests for leprosy: from biomarker discovery to application in endemic areas

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 17 november 2021
klokke 15.00 uur

door

Anouk van Hooij

geboren te Roosendaal en Nispen
in 1992

Promotor:

Prof. dr. A. Geluk

Co-promotor:

Dr. ir. P.L.A.M. Corstjens

Leden Promotiecommissie:

Prof. dr. A.H.M. van der Helm - van Mil

Prof. dr. J.H. Richardus (Department of Public Health, Erasmus MC, University Medical Center, Rotterdam, The Netherlands)

Prof. dr. V.P.M.G. Rutten (Division of Immunology, Department of Infectious Disease and Immunology, Faculty of Veterinary Medicine, Utrecht University, Utrecht, The Netherlands)

Dr. J.S. Spencer (Colorado State University, Department of Microbiology, Immunology and Pathology, Mycobacteria Research Laboratories, Fort Collins, CO, United States of America)

Table of Contents

Chapter 1	General introduction	6
Chapter 2	Quantitative lateral flow strip assays as user-friendly tools to detect biomarker profiles for leprosy	28
Chapter 3	Application of new host biomarker profiles in quantitative point-of-care tests facilitates leprosy diagnosis in the field	52
Chapter 4	Prototype multi-biomarker test for point-of-care leprosy diagnostics	76
Chapter 5	Field-friendly serological tests for determination of <i>M. leprae</i> -specific antibodies	102
Chapter 6	Evaluation of immunodiagnostic tests for leprosy in Brazil, China and Ethiopia	120
Chapter 7	Household contacts of leprosy patients in endemic areas display a specific innate immunity profile	144
Chapter 8	The anti-PGL-I antibody response in naturally <i>M. leprae</i> infected squirrels, a free-roaming animal model	168
Chapter 9	General discussion	182
	List of abbreviations	202
	Nederlandse samenvatting	204
	Dankwoord	208
	Curriculum vitae	210
	List of publications	211
