Risk factors for long-term failure of orthopaedic medical devices

**Taking advantage of RSA as an early
detection tool**

Koen van Hamersveld

The work described in this thesis was performed at the Department of Orthopaedics, Leiden University Medical Center, the Netherlands and the Department of Orthopaedics, Hässleholms Sjukhus, Sweden.

Cover design: Koen van Hamersveld

Lay-out and printed by: Optima Grafische Communicatie, Rotterdam, the Netherlands

ISBN: 978-94-6361-605-8

The printing of this thesis was financially supported by Anna Fonds|NOREF, HagaZiekenhuis, Nederlandse Orthopaedische Vereniging, Universitaire Bibliotheken Leiden.

Risk factors for long-term failure of orthopaedic medical devices

Taking advantage of RSA as an early detection tool

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 2 december 2021
klokke 12:30 uur

door

Koen Tijmen van Hamersveld

geboren te Amstelveen
in 1989

Promotores

Prof. dr. R.G.H.H. Nelissen

Prof. dr. ir. E.R. Valstar[†]

Copromotores

Dr. P.J. Marang-van de Mheen

Dr. S. Toksvig-Larsen Hässleholm Hospital & Lund University, Sweden

Leden promotiecommissie

Prof. dr. S.C. Cannegieter

Prof. dr. F.S. Haddad University College London Hospitals, United Kingdom

Dr. P.A. Nolte Spaarne Gasthuis, Hoofddorp

Prof. dr. R.W. Poolman

Prof. dr. M. J. Schalij

G. de Randamie (Sprokkeldagen, Tussen Licht en Lucht, 2007)

Table of contents

Chapter 1	General introduction	9
Part I	The effect of implant design on tibial component migration	
Chapter 2	Migration of all-polyethylene compared with metal-backed tibial components in cemented total knee arthroplasty: a randomized controlled trial <i>Acta Orthopaedica</i> 2018; 89: 412-7.	25
Chapter 3	Migration and clinical outcome of mobile-bearing <i>versus</i> fixed-bearing single-radius total knee arthroplasty: a randomized controlled trial <i>Acta Orthopaedica</i> 2018; 89:190-196.	41
Chapter 4	Fixation and clinical outcome of uncemented peri-apatite-coated <i>versus</i> cemented total knee arthroplasty: five-year follow-up of a randomized controlled trial using RSA <i>The Bone & Joint Journal</i> 2017; 99-B:1467-76.	61
Chapter 5	Peri-apatite coating decreases uncemented tibial component migration: long-term RSA results of a randomized controlled trial and limitations of short-term results <i>Acta Orthopaedica</i> 2018; 89: 425-30.	79
Part II	Surgical and patient risk factors for tibial component migration	
Chapter 6	Marker-based <i>versus</i> model-based radiostereometric analysis of total knee arthroplasty migration: a reanalysis with comparable mean outcomes despite distinct types of measurement error <i>Acta Orthopaedica</i> 2019; 90: 366-72.	99
Chapter 7	The effect of coronal alignment on tibial component migration following total knee arthroplasty: a cohort study with long-term radiostereometric analysis results <i>The Journal of Bone and Joint Surgery. American volume</i> 2019; 101: 1203-12.	123
Chapter 8	Risk factors for tibial component loosening: a meta-analysis of long-term follow-up RSA data <i>The Journal of Bone and Joint Surgery. American volume</i> 2021; 103:1115-24.	143

Chapter 9	Summary and general discussion	165
Chapter 10	In memoriam — Edward Valstar (1970–2017)	187
Appendices	Summary in Dutch (Nederlandse samenvatting)	191
	Author affiliations	199
	List of publications	201
	List of presentations	203
	Acknowledgements (dankwoord)	205
	Curriculum vitae	207
