Curriculum Vitae

Christoph Johannes Selig was born on January 6, 1989, in Rottweil, Germany. After completing his apprenticeship as an industrial clerk, he started his studies at the University of Applied Sciences in Konstanz. He holds a Bachelor in Engineering and Management in Electro and Information Technology (B.Eng) and a Master in Industrial Engineering and Management (M.Eng).

In 2015, he started working as a research assistant at the IST Institute (Institut für Strategische Innovation und Technologie Management in Konstanz, Germany), focusing on innovation management, digital transformation, and corporate entrepreneurship. In 2016, he was admitted to the Ph.D. program of the Faculty of Science at the Leiden Institute of Advanced Computer Science.

Next to the research, he was responsible for building up the local startup initiative Kilometer1 at the University of Applied Sciences in Konstanz, which is now an established organization at the university. In 2018, he joined the founding team of Unisphere GmbH, a deep-tech startup that develops technologies to automate the flight operations of unmanned aircraft. Since 2021 he is working full-time in the management team of Unisphere, responsible for the commercial activities.

Acknowledgments

On my way as a researcher, I have received diverse support from many persons, without whom my research and my personal development would not have come so far. In the following, I would like to express my gratitude to them. Starting with my supervising team, consisting of my first promotor Jaap van den Herik, my second promotor Guido Baltes and my co-promotor Roland Ortt, who guided and supported me with their complementary skills.

I am extremely grateful to Jaap van den Herik for the intense support in the final phase of the thesis and for the incredibly instructive time that has considerably improved my way of writing and structuring my knowledge. A special thank is owed to Guido Baltes for giving me the trust, freedom, and opportunity to set up the research on Corporate Entrepreneurship at the IST Institute with him, and for the many intense conversations and experiences that have led to the profound insights into managing CE programs and beyond. Furthermore, I express my gratitude to Roland Ortt for his support in formulating my thoughts and ideas and for the many intensive discussions that enabled me to better structure the findings, which eventually resulted in this dissertation.

Another second part of my Ph.D. career was the international graduate school NITIM (Networks, Information Technology, and Innovation Management), which gave me the opportunity to network and exchange ideas with researchers and other Ph.D. candidates across Europe and beyond. Here I would like to thank in particular Roland Ortt, Stefan Klein, Guido Baltes, Mauricio Camargo, Laurent Dupont, Claudia Bücken, Kristin Paetzold, Christina Weber, and all the other faculty members for their engagement which allowed me to have this wonderful opportunity of a European-wide graduate school.

During my time at the IST Institute, I had the opportunity to work with great colleagues with whom I could not only conduct research together, build up the Startup Initiative Kilometer1 of the University of Applied Sciences Konstanz, and manage various industry projects, but above all had an unforgettable time. The very exciting but also challenging time would have been hardly conceivable and in no way nearly enjoyable without them. Many thanks to Christina Ungerer, Tim Gasser, Christina Lang, Nicolai Heinzelmann, and Rebecca Off, and all others from the Kilometer1 and IST Institute community who were part of this journey.

During the six years of my research, I was fortunate to meet many exciting people. In particular, I would like to mention Christoph Stettina and Tobias Gutmann, with whom I was

able to further develop my ideas through a variety of discussions and also had the pleasure of working on joint publications.

A special thanks to my partner Ramona, who supported me in the last phase of my dissertation with her love and kindness during this stressful time. I would also like to thank all my old and new friends who have accompanied me during this time and enriched my life. Last but not least, I would like to thank my family, who supported me from the very beginning as the first member of the family to follow an academic path. They were always behind me and made it possible to pursue my interests and career in this way.
