My supervisors, Dr. Petra M. Sijpesteijn and Dr. Salim Tamari, are the most important people to thank for making this thesis possible. Petra was always supportive and paid full attention to my work despite her teaching and research load. This is also true for Salim, who supported me since the first time I visited him at the IPS in Ramallah, and kept giving me advice despite of the long distance.

A big thanks goes to all the people who helped me during my fieldwork in the West Bank: the staff at Birzeit University Museum, specially to Ayman al-Shwaiki, Ziad Youssef, and Balkees Nakhlah for their patience in showing me the Tawfik Canaan Collection of Palestinian Amulets and granting me access to the amulets and help me photograph the objects. Thanks to Baha al-Jubeh, who always answered my questions about the use of amulets and the donation of the Canaan Collection, Dr. Aref Abu Rabia who shared with me important information about the culture of the Bedouins of the Negev. Thanks to the staff of the Institute for Palestine Studies at Ramallah. A special thanks to my friends in Palestine who shared with me a lot about their everyday life and made it easier for me to understand Palestine's culture: Bubu and Chris Alami, Ibrahim Issayed and his family, Muhammad Abu Jayyeb, Muhammad Wassef.

I also thank LUCIS, LIAS and LUF for having sponsored my fieldwork and other activities during my research. A special word of appreciation goes to Birte Kristiansen, who proofread and edited the text, and to my boyfriend Taco, who helped me to translate the summary into Dutch. A word of thanks would also go to my friends/colleagues Eftychia, Ale, Hayat, Mahmood, Tijmen, Sami, and Soraya for their constant encouragement through the years. Finally, this research would not have been possible without the support of my friends and housemates, and to my two (Mexican and Dutch) families, specially to my dad, my mom and Broody.

This research was sponsored by Consejo Nacional de Ciencia y Tecnología (CONACyT) and Secretaría de Educación Pública (SEP).
