Towards solving the missing heritability in pharmacogenomics

Maaike van der Lee

The research presented in this thesis was performed at the department of Clinical Pharmacy and Toxicology of Leiden University Medical Center, Leiden, The Netherlands. Financial support for the publication of this thesis was provided by Afdelingsfonds Klinische Farmacie & Toxicologie.

The research leading to these results has received funding from the European Community's Horizon 2020 Programme under grant agreement No.668353 (U-PGx) and from the ZonMw enabling Technologies Hotel grant under agreement No.435004018.
