Academic network for research in elderly care

The studies in this thesis took place in the University Network for the Care Sector South Holland (UNC-ZH). In this network, the Leiden University Medical Center (LUMC) collaborates structurally with 12 elderly care organisations in South Holland (Marente, Pieter van Foreest, Florence, Topaz, Argos Zorggroep, Saffier, Laurens, Zonnehuisgroep Vlaardingen, Woonzorgcentra Haaglanden, Aafje, ActiVite, Haagse Wijk- en Woonzorg).

Caregivers, policy makers, researchers, students, residents and relatives work together to improve the quality of care and quality of life for vulnerable older people. The UNC-ZH is a regional platform, inspirator and learning network for innovation in long-term care. Research, education and training, and practice are closely related.

The research was funded by care organisation Laurens, Rotterdam and supported by Stichting Beroepsopleiding Huisartsen (SBOH). Financial support for the printing of this thesis was kindly provided by SBOH.

Comorbidity and outcomes in geriatric rehabilitation

Proefschrift

Ter verkrijging van de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. ir. H. Bijl
volgens besluit van het college voor promoties
te verdedigen op donderdag 3 februari 2022
klokke 13:45 uur

door

Anouk Dorothé Kabboord
geboren te Goes in 1983

Promotor: Prof. dr. W.P. Achterberg

Co-promotores: Dr. M. Van Eijk
Dr. R. Van Balen

Promotiecommissie: Prof. dr. J. Gussekloo
Prof. dr. B. M. Buurman, Universiteit van Amsterdam
Prof. dr. J. Schols, Universiteit Maastricht
Prof. dr. G. J. Blauw

The proof of the pudding is in the eating

Contents

- Chapter 1 General introduction
- Chapter 2 Assessment of comorbidity burden and its association with functional rehabilitation outcome after stroke or hip fracture: a systematic review and meta-analysis.
Kabboord AD, van Eijk M, Fiocco M, van Balen R, Achterberg WP. J Am Med Dir Assoc. 2016; 17(11): 1066.e13-1066.e21.
- Chapter 3 Reliability and usability of a weighted version of the functional comorbidity index.
Kabboord AD, van Eijk M, van Dingenen L, Wouters M, Koet M, van Balen R, Achterberg WP. Clin Interv Aging. 2019; 14: 289-299.
- Chapter 4 The modified functional comorbidity index performed better than the Charlson index and original functional comorbidity index in predicting functional outcome in geriatric rehabilitation: a prospective observational study.
Kabboord AD, Godfrey D, Gordon AL, Gladman JRF, van Eijk M, van Balen R, Achterberg WP. BMC Geriatr. 2020; 20(1): 114.
- Chapter 5 Comorbidity and intercurrent diseases in geriatric stroke rehabilitation: a multicentre observational study in skilled nursing facilities.
Kabboord AD, van Eijk M, Buijck BI, Koopmans RTCM, van Balen R, Achterberg WP. Eur Geriatr Med. 2018; 9(3): 347-353.
- Chapter 6 Comorbidity clusters and their association with geriatric rehabilitation outcome: intercurrent diseases, functional recovery, and discharge destination. *Submitted as: Kabboord AD, van Eijk M, van Balen R, Achterberg WP.*
- Chapter 7 General discussion
- Chapter 8 Summary
- Chapter 9 Samenvatting in het Nederlands
