Short-term Pre-operative Dietary Restriction in Vascular Surgery

Peter Kip

Short-term Pre-operative Dietary Restriction in Vascular Surgery

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 3 februari 2022
klokke 15:00 uur

Door

Peter Kip

Geboren te Emmen
09-05-1989

Cover: Intra-cellular hydrogen sulfide in vascular smooth muscle cells (image
taken by author of this thesis)

Cover design: Margreet de Vries
Printing: Proefschriftenprinten.nl

ISBN/EAN: 978-90-832173-5-2

No part of this thesis may be reproduced or transmitted in any form or by any
means, without permission of the author.

Promotores:

Prof. dr. P.H.A. Quax,

Prof. dr. C. Keith Ozaki (Harvard Medical School/Brigham and Women's Hospital, Boston, USA)

Co-promotor:

Dr. M.R. de Vries

Leden Promotiecommissie:

Prof. dr. J. Hamming (secretaris)

Prof. dr. M.J.T.H. Goumans

Prof. dr. J. W. Jukema

dr. A. Longchamp, CHUV, Lausanne, Zwitserland

dr. R. Hoencamp, Alrijne Ziekenhuis, Leiderdorp

This thesis is dedicated to the memory of

Professor James R. Mitchell

1971-2020

<https://doi.org/10.1016/j.cmet.2021.02.009>

The research as described in this thesis was a collaborative effort between the Department of Vascular and Endovascular Surgery (Brigham and Women's Hospital/Harvard Medical School, Boston USA), the Department of Molecular Metabolism (Harvard T.H. Chan School of Public Health, Boston USA) and the Department of Surgery, Leiden University Medical Center (The Netherlands).

The research presented in this thesis was financially partly supported by a post-doctoral fellowship from the American Heart Association and grants from the Prof. Michael van Vloten Foundation, Stichting de Drie Lichten, Prins Bernard Fonds en Leiden University Foundation (LUF).

Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged.

Financial support by Chipsoft for the publication of this thesis is gratefully acknowledged.

Table of Content

Chapter 1.	General Introduction and Thesis Outline	9	Chapter 6.	Insights from A Short-Term Protein-Calorie Restriction Exploratory Trial in Elective Carotid Endarterectomy Patients.	141
Chapter 2.	Preoperative Protein or Methionine Restriction Preserves Wound Healing and Reduces Hyperglycemia. Trocha KM*, Kip P* , MacArthur MR, Mitchell SJ, Longchamp A, Treviño-Villarreal JH, Tao M, Bredella MA, De Amorim Bernstein K, Mitchell JR, & Ozaki CK. (2019) Preoperative Protein or Methionine Restriction Preserves Wound Healing and Reduces Hyperglycemia. <i>The Journal of surgical research</i> , 235, 216–222. https://doi.org/10.1016/j.jss.2018.09.071 IF: 2.192	33		Kip P , Trocha KM, Tao M, O’leary JJ, Ruske J, Giulietti JM, Trevino-Villareal JH, MacArthur MR, Bolze A, Burak MF, Patterson S, Ho KJ, Carmody RN, Guzman RJ, Mitchell JR, & Ozaki CK. (2019). Insights from a Short-Term Protein-Calorie Restriction Exploratory Trial in Elective Carotid Endarterectomy Patients. <i>Vascular and endovascular surgery</i> , 53(6), 470–476. https://doi.org/10.1177/1538574419856453 IF: 1.089	
Chapter 3.	Short-Term Pre-Operative Protein Restriction Attenuates Vein Graft Disease Via Induction of Cystathionine Y-Lyase. Trocha KM*, Kip P* , Tao M, MacArthur MR, Treviño-Villarreal JH, Longchamp A, Toussaint W, Lambrecht BN, de Vries MR, Quax PHA, Mitchell JR, & Ozaki CK. (2020) Short-term preoperative protein restriction attenuates vein graft disease via induction of cystathionine γ -lyase. <i>Cardiovascular research</i> , 116(2), 416–428. https://doi.org/10.1093/cvr/cvz086 IF: 8.168	49	Chapter 7.	Short-Term Pre-Operative Protein-Calorie Restriction in Elective Vascular Surgery Patients: A Randomized Clinical Trial. Kip P , Sluiter TJ, Moore JK, Hart A, Ruske J, O’ Leary J, Jung J, Tao M, MacArthur MR, Heindel P, de Jong A, de Vries MR, Burak FM, Mitchell SJ, Mitchell JR & Ozaki CK (2021). Short-term protein-caloric restriction in elective vascular surgery patients: a randomized controlled clinical trial. <i>Nutrients</i> , 2021, 13(11), 4024; https://doi.org/10.3390/nu13114024 IF: 5.43	163
Chapter 4.	Short-Term Pre-Operative Methionine Restriction Protects from Vascular Wall Maladaptation Via PVAT Dependent Mechanisms. Kip P , Sluiter TJ, Trocha KM, MacArthur MR, Tao M, Mitchell SJ, Jung J, Quax PHA, Mitchell JR, Ozaki CK, de Vries MR. (2021). Short-Term Pre-Operative Methionine Restriction Protects from Vascular Wall Maladaptation Via PVAT Dependent Mechanisms. Manuscript in preparation	81	Chapter 8.	General Summary and Future Perspectives Nederlandse samenvatting Acknowledgements Curriculum Vitae Publications Grants and Awards	193 207 212 214 216 218
Chapter 5.	Periprocedural Hydrogen Sulfide Therapy Improves Vascular Remodeling and Attenuates Vein Graft Disease. Kip P* , Tao M*, Trocha KM, MacArthur MR, Mitchell SJ, Mann C, Sluiter TJ, Jung J, Patterson, Quax PHA, de Vries MR, Mitchell JR & Ozaki CK (2020). Periprocedural hydrogen sulfide therapy improves vascular remodeling and attenuates vein graft disease. <i>Journal of the American Heart Association</i> . 2020 Nov 17;9(22): e016391. https://doi.org/10.1161/JAHA.120.016391 IF: 5.551	111
