**TRIAL@HOME FOR CHILDREN**

NOVEL NON-INVASIVE METHODOLOGY FOR THE PEDIATRIC CLINICAL TRIAL OF THE FUTURE

# **Trial@home for children**

Novel non-invasive methodology for  
the pediatric clinical trial of the future

PROEFSCHRIFT

ter verkrijging van

de graad van doctor aan de Universiteit Leiden,  
op gezag van rector magnificus prof.dr.ir. H. Bijl,  
volgens besluit van het college voor promoties  
te verdedigen op donderdag 10 februari 2022  
klokke 16:15 uur

DOOR

Matthijs Derk Kruizinga  
geboren te 's-Gravenzande  
in 1991

## PROMOTORES

Prof. dr. A.F. Cohen  
Prof. dr. G.J.A. Driessen, Maastricht UMC

## COPROMOTOR

Dr. F.E. Stuurman

## LEDEN PROMOTIECOMMISSIE

Prof. dr. E. Dompeling, Maastricht UMC  
Prof. dr. C.A.J. Knibbe, St. Antonius Ziekenhuis  
Dr. P.J.M. van der Boog  
Dr. M.G.H. van Oijen

**Design** Caroline de Lint, Voorburg (caro@delint.nl)

Publication of this thesis was financially supported by the foundation Centre for Human Drug Research (CHDR) in Leiden, the Netherlands

## PART I – INTRODUCTION

- 1 The Future of Clinical Trial Design – *The transition from hard endpoints to value-based endpoints* – 9
- 2 Development of Novel, Value-Based, Digital Endpoints for Clinical Trials – *A structured approach toward fit-for-purpose validation* – 35

## PART II – TECHNICAL VALIDATION OF DIGITAL ENDPOINTS

- 3 Development and technical validation of a smartphone-based cry detection algorithm – 59
- 4 Development and technical validation of a smartphone-based pediatric cough detection algorithm – 75
- 5 Technical validity and usability of a novel smartphone-connected spirometry device for pediatric patients with asthma and cystic fibrosis – 89

## PART III – CLINICAL VALIDATION OF DIGITAL ENDPOINTS

- 6 Towards remote monitoring in pediatric care and clinical trials – *Tolerability, repeatability and reference values of candidate digital endpoints derived from physical activity, heart rate and sleep in healthy children* – 107
- 7 Digital biomarkers for pediatric patients with asthma and cystic fibrosis – *Clinical validation of physical activity, heart rate, sleep and FEV1* – 129
- 8 Post-discharge recovery after acute pediatric lung disease can be quantified with digital biomarkers – 153
- 9 Objective home-monitoring of physical activity, cardiovascular parameters and sleep in pediatric obesity patients using digital biomarkers – 171
- 10 Remote monitoring with digital biomarkers in pediatric patients with sickle cell disease – *A pilot study* – 189
- 11 Finding Suitable Clinical Endpoints for a Potential Treatment of a Rare Genetic Disease – *The case of ARID1B* – 199

## PART IV – NON-INVASIVE PHARMACOKINETICS

- 12 Theoretical performance of non-linear mixed effect models incorporating saliva as alternative sampling matrix for therapeutic drug monitoring in pediatrics – *A simulation study* – 219
- 13 Population pharmacokinetics of clonazepam in saliva and plasma – *First steps towards non-invasive pharmacokinetic studies in vulnerable populations* – 239
- 14 Saliva as sampling matrix for therapeutic drug monitoring of gentamicin in neonates – *A prospective population pharmacokinetic-and simulation study* – 257
- 15 Pharmacokinetics of intravenous and inhaled salbutamol and tobramycin – *An exploratory study to investigate the potential of exhaled breath condensate as a matrix for pharmacokinetic analysis* – 277

## PART V – DISCUSSION

- 16 Discussion: Trial@home in pediatrics – *A framework for remote and non-invasive data collection in pediatric clinical trials* – 290
- 17 Nederlandse samenvatting: Trial@home bij kinderen – *Een raamwerk voor non-invasieve dataverzameling op afstand voor klinisch onderzoek binnen de kindergeneeskunde* – 301

## APPENDICES

- Curriculum Vitae – 311
- List of publications – 312
- Dankwoord – 314
