**Unravelling molecular mechanisms in
transcription-coupled nucleotide
excision repair**

Unravelling molecular mechanisms in transcription-coupled nucleotide excision repair

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 17 februari 2022
Klokke 11.15 uur

door

Yana van der Weegen

geboren te Leiderdorp

Promotor

Prof. dr. ir. S.M. van der Maarel

Copromotor

Dr. M.S. Luijsterburg

Leden promotiecommissie

Prof. dr. H. van Attikum

Prof. dr. A.C.O. Vertegaal

Dr. J. Jacobs

NKI

Dr. J. Martejijn

Erasmus MC

Cover design and layout by: Y. van der Weegen

Printed by: GVO drukkers & vormgevers B.V.

ISBN: 978-94-6421-617-2

The available Cryo-EM structures (PDB:5OXG, 5IY9 and 5VVS) were used for the cover.

Contents

Summary	7
Samenvatting	9
1 Transcription-coupled DNA repair: from mechanism to human disorder	13
2 The cooperative action of CSB, CSA and UVSSA target TFIIH to DNA damage-stalled RNA polymerase II	33
3 ELOF1 is a transcription-coupled DNA repair factor that directs RNA polymerase II ubiquitylation	71
4 The identification of candidate TCR proteins and potential CRL4^{CSA} substrates using a proximity-dependent labeling approach	113
5 Mechanisms to alleviate transcription-replication collisions: an RNA polymerase II perspective	131
Acknowledgements	149
Curriculum Vitae	151
List of Publications	153
