APPENDIX B

A short dictionary of Alorese-English-Indonesian

B.1 Overview

This dictionary contains a wordlist generated from the FLEx database based on the Alorese dialect spoken in northeast Pantar, particularly in the villages of Pandai, Wailawar, and Kabir. In this list, I include examples that I gathered in the field during the time when I make data confirmation in my fieldwork in 2020. In addition, there are notes that are based on the grammatical description in Chapter 4 of this dissertation.

In this short dictionary, the given Alorese words and sentences are in boldface and their English meaning are in normal font, while their Indonesian (Ind) translation are in italics. Note that Alorese does not have the word category of Adjective (cf. §4.6.2.3); the category of adjective in this dictionary refers to Indonesian adjectives (Pusat Pembinaan dan Pengembangan Bahasa, 2008). Below is the list of abbreviations used in this dictionary.

Western Lamaholot lexeme sets

This appendix contains the lexeme sets used in Chapter 5 of this dissertation. The sources of the database have been discussed in §5.3.1. The sets are sorted alphabetically based on the concept of each lexeme set, here given in bold. The forms are given in IPA with exceptions discussed in §5.3.3.

The reconstructed Proto-Western-Lamaholot (PWL) and Proto-Alorese (PAL) forms are marked by an asterisk (*). The potential reconstructions that cannot be reconstructed to a proto form with certainty, but found widespread are marked with a hash sign (#). Other proto forms (PMP and PFL) are not included in this appendix. In addition, this appendix contains several lexeme sets without reconstruction, but potentially reconstructed to PWL or earlier (higher level) proto-languages.

In this appendix, abbreviations below are used to represent the Western Lamaholot varieties, including Alorese.
