PROEFSCHRIFT

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl
volgens besluit van het college voor promoties
te verdedigen op woensdag 16 maart 2022
klokke 15:00 uur

door

Remko Goossens

geboren te Oostburg
in 1989

Promotor:

Prof.dr.ir. S.M. van der Maarel

Co-promotor:

Dr. J. Balog

Promotiecommissie:

Prof.dr. W.M.C. van Roon-Mom

Prof.dr. A.C.O. Vertegaal

Dr. W.W.M. Pijnappel^{1,2,3}

³ Center for Lysosomal and Metabolic Diseases, Erasmus MC University Medical Center, Rotterdam, The Netherlands

⁴ Department of Neurology, Donders Institute for Brain, Cognition and Behaviour, Radboud University Medical Center, Nijmegen, The Netherlands

The studies described in this thesis have been performed at the department of Human Genetics, Leiden University Medical Center, The Netherlands.

Table of contents

Chapter 1	General Introduction	7
	Clinical Genetics, 2020: 97(6): 799-814	
Chapter 2	Monosomy 18p is a risk factor for facioscapulohumeral dystrophy	45
	Journal of Medical Genetics 2018; 55(7):469-478	
Chapter 3	Intronic <i>SMCHD1</i> variants in FSHD: testing the potential for CRISPR-Cas9 genome editing	69
	Journal of Medical Genetics 56(12): 828-837	
Chapter 4	A proteomics study identifying interactors of the FSHD2 gene product <i>SMCHD1</i> reveals RUVBL1-dependent DUX4 repression	103
	Scientific reports 11 (1):23642	
Chapter 5	SUMOylation regulates DUX4 expression in FSHD muscle cells by affecting <i>SMCHD1</i> and other D4Z4 chromatin repressor complex activity	139
Chapter 6	Summarizing discussion	175
Appendix	Appendices	191
	English summary	193
	Nederlandse samenvatting	195
	Curriculum vitae	198
	List of publications	199
	Acknowledgements	200
