Curriculum Vitae

Ming Jiang was born on July 13th, 1990 in Nanchang, Jiangxi province, China. After finishing high school education in Nanchang, he started his Bachelor of Science in Huazhong University of Science and Technology with a major in pharmacy. In 2011, he obtained his Bachelor of Science and joined in Peking Union Medical College, majoring in medicinal chemistry. He did a Master research project in the group of prof. Peixun Liu, which focused on the discovery of dual iNOS and COX-2 inhibitors.

In 2015, he started as a PhD candidate in the Bio-Organic Synthesis group at Leiden Institute of Chemistry (Leiden University, The Netherlands). After one year, he continued his research in the newly created department of Molecular Physiology. He performed his research under the supervision of prof. dr. Mario van der Stelt, prof. dr. Stan van Boeckel and dr. Richard van den Berg.

Parts of the research were presented on posters at various (inter)national conferences, including CHAINS (Veldhoven, 2017) and International Cannabinoid Research Society's Conference (Leiden, 2018), of which the latter was awarded a poster prize. Oral presentation was held at CHAINS (Online, 2020).
