Microbiome-mediated colonization resistance: defense against enteropathogens and multi-drug resistant organisms

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit
Leiden, op gezag van rector magnificus
prof.dr.ir. H. Bijl, volgens besluit van het
college voor promoties te verdedigen op
woensdag 23 maart 2022
klokke: 11:15 uur

door

Quinten Raymond Ducarmon
geboren te Terneuzen
In 1994

Promotor

Prof. Dr. E.J. Kuijper

Co-promotor

Dr. R.D. Zwittink

Leden promotiecommissie

Prof. Dr. P.C.N. Rensen

Prof. Dr. D. Bogaert (University of Edinburgh)

Dr. G. Zeller (European Molecular Biology Laboratory)

Prof. Dr. L.G. Visser

The printing of this thesis was financially supported by the Medical Microbiology department of the Leiden University Medical Center

Table of contents

Chapter 1	General introduction and thesis outline	11
Part I: Mechanisms of microbiome-mediated colonization resistance and how to develop microbiome-based therapies		29
Chapter 2	Gut microbiota and colonization resistance against bacterial enteric infection	31
Chapter 3	Opportunities and challenges in development of live biotherapeutic products to fight infections	77
Part II: Optimization and standardization of laboratory and computational procedures for microbiome research		91
Chapter 4	Toward standards in clinical microbiota studies: comparison of three DNA extraction methods and two bioinformatic pipelines	93
Chapter 5	Development of a novel computational tool for profiling of carbohydrate-active enzymes in the human gut and its application in colorectal cancer cohorts	119
Part III: Identifying microorganisms associated with colonization resistance in clinical studies		155
Chapter 6	The bacterial gut microbiota of adult patients infected, colonized or non-colonized by <i>Clostridioides difficile</i>	157
Chapter 7	Dynamics of the bacterial gut microbiota during controlled human infection with <i>Necator americanus</i> larvae	177
Chapter 8	Microbiota-associated risk factors for asymptomatic gut colonisation with multi-drug-resistant organisms in a Dutch nursing home	199
Chapter 9	Asymptomatic gut colonization by extended-spectrum beta-lactamase-producing <i>Escherichia coli</i> is not associated with an altered gut microbiome or metabolome in Dutch adults	229

Chapter 10	General discussion and future perspectives	253
	Nederlandse samenvatting	280
	Acknowledgements	286
	List of publications	288
	PhD Portfolio	290
	Curriculum vitae	292
