The molecular basis of metabolic syndrome:
Studies in zebrafish

Natalia Nowik

**The molecular basis of metabolic syndrome:
Studies in zebrafish**

Proefschrift

ter verkrijging van

de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 30 maart 2022

klokke 13:45 uur

door

Natalia Nowik

geboren te Olsztyn, Polen

in 1987

Promotor: Prof. Dr. H. P. Spaik

Co-promotor: Dr. M. J. M. Schaaf

Promotiecommissie: Prof. Dr. G. P. van Wezel
Prof. Dr. A. H. Meijer
Prof. Dr. J. den Hertog
Dr. M.H.A.G. Gorissen (Radboud Universiteit)
Dr. P. Podlasz (University of Warmia and Mazury)

Table of contents

Chapter I: Introduction	8
Chapter II: A comparative transcriptome study of the effects of knock down of the Ptpn6 protein by treatment with morpholino or inhibitor NSC-87877 during mycobacterial infection in zebrafish larvae	27
Chapter III: The function of leptin in the defense against mycobacterial infection in zebrafish	52
Chapter IV: Leptin is essential for insulin signaling during zebrafish embryogenesis	80
Chapter V: Glucocorticoid modulation of metabolic changes induced by mycobacterial infection	104
Summary and discussion	132
Summary in Dutch	140
List of abbreviations	147
Curriculum vitae	148
List of Publications	149
Acknowledgments	150
