Tautological differential forms on moduli spaces of curves

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 12 april 2022
klokke 12:30 uur

door

Stefan van der Lugt
geboren te Haarlem
in 1991

Promotores: Prof.dr. R.M. van Luijk
† Prof.dr. S.J. Edixhoven

Copromotor: Dr. R.S. de Jong

Promotiecommissie:

Prof.dr. C.F. Faber (Universiteit Utrecht)
Dr. D.S.T. Holmes
Prof.dr. R.M. van Luijk
Dr. D. Petersen (Stockholm University)
Prof.dr. F.M. Spieksma

The research for this thesis was financed by TOP grant 613.001.401 *Refined tautological relations on moduli spaces of curves* of the Dutch Research Council (NWO).

Contents

Introduction	iii
1 Families of curves	1
1.1 Families of manifolds	1
1.1.1 Submersions	2
1.1.2 Fiber products of manifolds	3
1.1.3 Oriented submersions	6
1.1.4 Holomorphic submersions and families of curves	8
1.2 Currents	10
1.2.1 Currents on manifolds	10
1.2.2 Pushforwards of currents	12
1.2.3 Currents on complex manifolds	13
1.3 Integration along fibers	15
1.3.1 First properties of the fiber integral	16
1.3.2 Construction of the fiber integral	18
1.3.3 More properties of the fiber integral	24
1.3.4 The fiber integral along holomorphic submersions	27
1.4 Hermitian line bundles on families of curves	28
1.4.1 The Poincaré bundle	28
1.4.2 The Deligne pairing	30
1.4.3 Hermitian metrics, first Chern form	33
1.4.4 Admissible metrics	35
1.4.5 Biadmissible metrics	37
1.4.6 Canonical isometries	38
2 The moduli space of genus g curves	43
2.1 Motivating example: the Grassmannian manifold	44
2.2 Fine moduli spaces	46
2.3 Mapping class groups and Teichmüller structures	49
2.4 Stacks	52
2.5 Differential forms on stacks	59
2.5.1 Differential forms	59
2.5.2 Pullbacks	60
2.5.3 Fiber integrals	61

2.5.4	Differential forms on moduli stacks	64
2.6	Hermitian vector bundles on moduli spaces of curves	67
2.7	The universal Jacobian bundle	70
3	Marked graphs	73
3.1	The category of r -marked graphs	73
3.2	Gluing marked graphs	75
3.3	Pushforward maps on marked graphs	76
3.4	Pullback maps on marked graphs	78
3.5	The monoid of r -marked graphs	79
3.6	Contracted graphs	80
3.7	Counting contracted graphs	82
3.8	The size of $\text{CG}(r, r - d)$ in terms of r	84
3.9	Computing closed formulas for $ \text{CG}(r, r - d) $	89
4	Tautological differential forms on moduli of curves	93
4.1	Tautological morphisms and submersions	93
4.2	Tautological classes	95
4.3	Rings of tautological differential forms	97
4.4	Tautological forms associated to marked graphs	102
4.5	Graph operations and tautological forms	105
4.6	Graph contractions and tautological forms	108
4.7	The ring of tautological forms as a quotient algebra	112
4.8	Tautological 2-forms	114
4.9	Tautological $2d$ -forms	119
4.10	Relations induced by Abel–Jacobi maps	120
4.11	Computations in higher degrees and genera	124
