# TABLE OF CONTENTS

<b>PART ONE</b>	<b>OVERVIEW</b>	
	General introduction	11
Chapter 1	Neonatal management and outcome in alloimmune haemolytic disease	21
<b>PART TWO</b>	<b>PREDICTORS OF SEVERE DISEASE</b>	
Chapter 2	Foetal bilirubin as predictor of exchange transfusion in severe haemolytic disease of the foetus and newborn	49
Chapter 3	Suppression of compensatory erythropoiesis in haemolytic disease of the foetus and newborn due to intrauterine transfusions	61
<b>PART THREE</b>	<b>NEONATAL MANAGEMENT AND COMPLICATIONS</b>	
Chapter 4	Exchange transfusions in severe alloimmune haemolytic disease of the foetus and newborn: a 20-year overview on the incidence, associated risks and outcome	85
Chapter 5	Predicting anaemia and transfusion dependency in severe alloimmune haemolytic disease of the foetus and newborn in the first three months after birth	103
Chapter 6	Randomised controlled trial on the use of EPO to reduce postnatal transfusions in neonates with red blood cell alloimmunisation treated with intrauterine transfusions (protocol)	127
Chapter 7	Necrotising enterocolitis in haemolytic disease of the newborn: a retrospective cohort study	135
<b>PART FOUR</b>	<b>LONG-TERM OUTCOME</b>	
Chapter 8	School performance and behavioural functioning in children after intrauterine transfusions for haemolytic disease of the foetus and newborn	149

<b>PART FIVE</b>	<b>SUMMARY AND DISCUSSION</b>	
Summary		166
Nederlandse samenvatting		170
General discussion and future perspectives		175
<b>PART SIX</b>	<b>APPENDICES</b>
