APPENDIX 1. Detailed breakdown of food intake records in Sako Tulang

Table 38. Composition of breakfast of two households, Sako Tulang

Type of food	Frequency		Percentage		Percentage (Average)
	HH 1 (n = 180)	HH 2 (n = 180)	HH 1	HH 2	
Carbohydrate	178	178	98.9	98.9	98.9
Animal protein	137	144	76.1	80	78.1
Fruit	0	0	0	0.0	0.0
Vegetable	3	2	1.7	1.1	1.4

Table 39. Composition of lunch of two households, Sako Tulang

Type of food	Frequency		Percentage		Percentage (Average)
	HH 1 (n = 168)	HH 2 (n = 173)	HH 1	HH 2	
Carbohydrate	166	169	98.8	97.7	98.3
Animal protein	134	132	79.8	76.3	78.1
Fruit	0	0	0.0	0.0	0.0
Vegetable	4	6	2.4	3.5	2.8

Table 40. Composition of dinner of two households, Sako Tulang

Type of food	Frequency		Percentage		Percentage (Average)
	HH 1 (n = 174)	HH 2 (n = 175)	HH 1	HH 2	
Carbohydrate	157	164	90.2	93.7	91.95
Animal protein	112	122	64.4	69.7	67.05
Fruit	0	0	0.0	0.0	0.0
Vegetable	2	1	1.1	0.6	0.85

APPENDIX 2. Detailed breakdown of food intake records in Terab

Table 41. Composition of breakfast of two households, Terab					
Type of food	Frequency		Percentage		Average
	HH 1 (n = 132)	HH 2 (n = 46)	HH 1	HH 2	
Carbohydrate	93	37	70.5	80.4	75.5
Animal protein	72	19	54.5	41.3	47.9
Fruit	16	1	12.1	2.2	7.2
Vegetable	6	1	4.5	2.2	3.4

Table 42. Composition of lunch of two households, Terab					
Type of food	Frequency		Percentage		Average
	HH 1 (n = 149)	HH 2 (n = 47)	HH 1	HH 2	
Carbohydrate	137	42	91.9	89.4	90.7
Animal protein	114	34	76.5	72.3	74.4
Fruit	12	5	8.1	10.6	9.3
Vegetable	0	5	0.0	10.6	5.3

Table 43. Composition of dinner of two households, Terab					
Type of food	Frequency		Percentage		Average
	HH 1 (n = 180)	HH 2 (n = 60)	HH 1	HH 2	
Carbohydrate	177	59	98.3	98.3	98.3
Animal protein	126	38	70.0	63.3	66.7
Fruit	1	0	0.6	0.0	0.3
Vegetable	0	0	0.0	0.0	0.0

APPENDIX 3. Detailed breakdown of food intake records in Air Hitam

Table 44. Composition of breakfast of two households, Air Hitam

Type of food	Frequency		Percentage		Average
	HH 1 (n = 180)	HH 2 (n = 158)	HH 1	HH 2	
Carbohydrate	179	148	99.4	93.7	96.6
Animal protein	134	106	74.4	67.1	70.8
Fruit	0	0	0.0	0.0	0.0
Vegetable	10	0	5.6	0.0	2.8

Table 45. Composition of lunch of two households, Air Hitam

Type of food	Frequency		Percentage		Average
	HH 1 (n = 169)	HH 2 (n = 160)	HH 1	HH 2	
Carbohydrate	163	159	96.4	99.4	97.9
Animal protein	125	123	74.0	76.9	75.4
Fruit	0	0	0.0	0.0	0.0
Vegetable	7	7	4.1	4.4	4.3

Table 46. Composition of dinner of two households, Air Hitam

Type of food	Frequency		Percentage		Average
	HH 1 (n = 176)	HH 2 (n = 177)	HH 1	HH 2	
Carbohydrate	158	168	89.8	94.9	92.3
Animal protein	107	119	60.8	67.2	64.0
Fruit	0	0	0.0	0.0	0.0
Vegetable	3	1	1.7	0.6	1.1

APPENDIX 4. List of edible plants and animals by the Orang Rimba in three groups

Table 47. Varieties of tubers consumed by the the Orang Rimba, 2013-2016

Classification	Local Name	Bahasa Indonesia	English	Species	Sako Tulang	Terab	Air Hitam

Curriculum Vitae

Ekoningtyas Margu Wardani (Dani) was born on 30 October 1976 in the small town of Purwodadi in Central Java, Indonesia. She is the first child from teacher parents, her mother was a kindergarten teacher, and her father was a school principal. After finishing her high school education in Purwodadi, she went to university to study economics. She finished her bachelor's and master's degrees at Universitas Gajah Mada in Yogyakarta (Indonesia). From February 2004 up to January 2015, she was affiliated with the Centre for Asia and Pacific Studies at Universitas Gadjah Mada as a researcher. Her first field research among the Orang Rimba took place during that period.

In 2012 she was accepted as a PhD student at the Institute for Cultural Anthropology and Development Sociology of Leiden University, with a grant from the Louwes Fund for Research on Water and Food. For this research, she returned to Jambi to do fieldwork among the Orang Rimba again. At present she is a Programme Specialist for Resource Economy and Livelihood at the ASEAN Centre for Biodiversity, the Philippines. Besides being actively engaged in her regular work, she also works on research projects and consultancies. Her focus is on natural resource management, food security, indigenous peoples, environmental economics, and sustainable livelihoods.

Food Security among the Orang Rimba in Jambi

By using the lens of food security, it is possible to understand the transformation processes of the Orang Rimba hunter-gatherers in Central Jambi (Sumatra, Indonesia) in times of change. The establishment of rubber and oil palm plantations in their home territory has become the major factor in the economic development of the province.

This dissertation uses a multidisciplinary approach to study food security, employing methods from economics and anthropology. It analyzes the food security conditions using the combined techniques of daily food intake and ethnographic approaches.

While the Orang Rimba are facing food insecurity conditions due to various pressures, it is of great importance to protect the remaining forest in which the Orang Rimba live. This is not only crucial for the Orang Rimba's food security and livelihoods but also for protecting the biodiversity in the Bukit Duabelas National Park and its adjacent areas that the Orang Rimba call their home.
